STATE OF NEW JERSEY,
DEPARTMENT OF PUBLIC INSTRUCTION,
PLAINFIELD, *January 15, 1865.* }

To his Excellency, JOEL PARKER, Governor of the State of New Jersey:

SIR:—I have the honor herewith to transmit the annual report respecting the condition of the Public Schools of the State, as required by law.

Very respectfully,

Your obedient servant,

C. M. HARRISON,
State Superintendent of Public Schools.

ANNUAL REPORT
OF THE
NEW JERSEY STATE BOARD of EDUCATION,
WITH THE REPORT
OF THE
State Superintendent of Public Instruction,
FOR THE YEAR 1867.

STATE OF NEW JERSEY, }
DEPARTMENT OF PUBLIC INSTRUCTION, }
TRENTON, January 1, 1868. }

To his Excellency Marcus L. Ward, Governor of State of New Jersey:

SIR:—In conformity to law, I have the honor herewith to transmit the report of the State Board of Education together with my annual report respecting the condition of the Public Schools of the State for the year ending August 31, 1867.

Yours respectfully,
E. A. APGAR,
State Superintendent of Public Instruction.

MEMBERS OF THE BOARD OF EDUCATION.

His Excellency MARCUS L. WARD, Governor, Newark.
Hon. GEORGE M. ROBESON, Attorney General, Camden.
Hon. WILLIAM K. McDONALD, State Comptroller, Newark.
Hon. H. N. CONGAR, Secretary of State, Trenton.
Hon. BENJAMIN BUCKLEY, President of the Senate, Paterson.
Hon. GEORGE W. N. CUSTIS, Speaker of the Assembly, Camden.
Hon. RICHARD S. FIELD, Princeton,
THOMAS LAWRENCE, Esq., Hamburg,
WILLIAM A. WHITEHEAD, Esq., Newark,
BENJAMIN WILLIAMSON, Esq., Elizabeth,
BENNINGTON F. RANDOLPH, Esq., Jersey City,
J. F. LEAMING, M. D., Cape May C. H.
EDWARD W. SCUDDER, Esq., Trenton,
RYNIER H. VEGHTE, Esq., Somerville,
JOHN M. HOWE, M. D., Passaic,
CHARLES E. ELMER, Esq., Bridgeton,
ELIAS COOK, Esq., Treasurer of the Normal School, Trenton.

*Trustees of the
State
Normal School.*

OFFICERS.

President—His Excellency MARCUS L. WARD.
Vice-President—Hon. RICHARD S. FIELD.
State Superintendent and (ex officio) Secretary—ELLIS A. APGAR.

EXECUTIVE COMMITTEE.

Hon. RICHARD S. FIELD. EDWARD W. SCUDDER, Esq.
WILLIAM A. WHITEHEAD, Esq., Hon. H. N. CONGAR,
Hon. WILLIAM K. McDONALD.

COMMITTEE ON GROUNDS AND BUILDINGS.

ELIAS COOK, Esq.,

Hon. H. N. CONGAR.

REPORT OF THE STATE BOARD OF EDUCATION.

TRENTON, January 14, 1868.

To the Legislature :

By act of the Legislature approved March 21st, 1867, and entitled "An act to establish a system of Public Instruction," it was provided "that all acts and parts of acts heretofore passed of a general character on the subject of public schools and of the Normal School and its appropriations are hereby repealed." Consequently the State Board of Education, created by statute approved March 20th, 1866, and under the statute first named composed of the same persons, as under the last, except the Principal of the Normal School, at their first meeting after the passage of the law of 1867, proceeded to reorganize, and elected the same officers as in the preceding year, with the exception of Treasurer, which office was discontinued; Ellis A. Apgar was also elected to the office of State Superintendent of Public Instruction; at this same meeting notice was ordered to be given, that on a special day in April then next ensuing, an election of County Superintendents would be made by the State Board, for the several counties in the State.

This office of County Superintendent, created by the act of 1867, was a new feature in the school system, and deemed by the Board, to be of supreme importance in rendering the new school law effective as well as popular, among the people; hence great deliberation was required to fill this office properly. The appointment was moreover subject to the approval or rejection of the Board of Chosen Freeholders of the respective counties, and it was judged to be of the first importance that no collusion should ensue between the State Board and the Chosen Freeholders in regard to these appointments.

With these sentiments, the State Board met at Trenton last April, in order to make these appointments. They sat continuously for two days. The applications were in every instance earnestly canvassed and discussed; no politics even incidentally came into the discussion. The only questions asked were as to the competency and integrity of the candidates.

Superintendents for the twenty-one counties of the State were appointed, all of whom, with the exception of six or seven, were confirmed by the Boards of Chosen Freeholders; and the places of those rejected were supplied at subsequent meetings of the Board, until the whole corps had been confirmed in their respective counties, and so

far as the office of County Superintendent was concerned, the law went into operation.

And the Board believe that the law has now gone into successful operation throughout the State, and ought not to be repealed. Reports come from every quarter that it is winning its way towards just appreciation.

It is not assumed that the present law is perfect, but it is claimed that it is the best law the State has ever had, and if fairly carried out according to its terms and in a liberal spirit, will eventually spread its blessings broadcast over the State. It will not do in this age of progress for any State to deny to its children the blessings of a common school education, much less would such denial become New Jersey, with her noble institutions of learning, with her Reform School, her school for the children of soldiers, her Normal School, and her generous aid to her indigent children, who, being mutes, or blind or feeble minded, are year by year supported by her bounty in the institutions of other States, because she has no asylum of her own in which they can be received.

The act of last year appropriated \$100,000 for the support of the public schools—\$60,000 from the revenue of the State, and \$40,000 from the income of the School Fund. By the act of April 11, 1866, the several provisions of law regulating the payment of certain amounts of tax by the State Banks for the benefit of public schools were repealed, and the School Fund has been unable from its annual income to pay the \$40,000 required by the act of 1867. This deficiency has been supplied from the State Fund.

It is hoped in view of the great importance of common school education, that the Legislature will continue, if not increase the appropriation of last year, to the end that greater blessings may abide among our people, and New Jersey may rise in dignity and importance among her sister commonwealths.

MARCUS L. WARD,
President of State Board of Education.

REPORT OF THE STATE SUPERINTENDENT.

DEPARTMENT OF PUBLIC INSTRUCTION, }
TRENTON, December 5, 1867. }

To the Honorable the Members of the State Board of Education :

GENTLEMEN :—In obedience to the requirements of the law, I have the honor to present to you the following report for the school year ending August 31, 1867.

The following is a brief summary of the number of children in the State, and of the amount of money appropriated for the support of public education during the school year ending August 31, 1867 :

Amount of money appropriated by the State,	\$100,000 00
Amount received from surplus revenue,	26,531 54
Amount received from township and city tax,	725,664 09
Amount received from district tax,	32,534 79
Amount appropriated for support of Normal School,	10,000 00
Amount appropriated for support of Farnum School,	1,200 00
Total,	\$895,930 42

The above total does not include moneys raised for building and repairing school-houses, nor that collected as tuition fees for the payment of teachers' salaries.

The whole number of children in the State, between five and eighteen years of age, is 230,518.

The following is the financial and census report by counties :

896 26 00

FINANCIAL AND CENSUS REPORT BY COUNTIES.

COUNTIES.	Amount of money received from the State.	Amount received from surplus revenue.	Amount received from township and city tax.	Amount received from district tax and other sources.	Total amount received for the support of the public schools.	Whole number of children between five and eighteen years of age.

SCHOOL LAW.

It has been with earnest solicitude that I have observed the practical workings of the present school law, and the state of public sentiment in relation thereto.

In regard to its practical workings, it can scarcely be said to have had a fair trial, yet, few can have failed to observe that it has already been productive of some most excellent results. The County Superintendents are heartily welcomed at the meetings of the township Boards of Trustees, where subjects relating to the interests of education are discussed; a desire among teachers to acquaint themselves with improved methods of instruction, and to become better educated and more proficient in their duties, has been excited by the system of graded licenses which are granted; school districts are consolidated and made larger and stronger instead of the reverse, as was the case under the old law; larger salaries are paid to teachers, and teachers holding first grade certificates are in demand; uniformity of text books is being generally adopted; the old school-houses are being torn down, and new, commodious and convenient ones are in the course of erection in many parts of the state; township school taxes have been greatly increased, and in many of the rural districts the schools are being made free by district taxes; and that general apathy in regard to education, which for years has seemed to pervade a considerable portion of our people, is being removed, and a lively interest in relation to the intellectual welfare of the children is becoming general.

When the school law was first passed, murmurings and complaints were common. As far as possible I took pains to inquire into the nature, extent and cause of these complainings, and it soon became apparent that a very large part of the trouble was directly referable to a misapprehension of the provisions of the law itself. They misjudged the motives of those who advocated its passage; they did not understand the powers conferred and the duties imposed upon school officers, and their greatest fears were that undue authority would be exercised. I have reason to believe that the great majority of those who at first objected to the law were entirely honest in their objections. This appears true from the fact that as the teachers, employers, trustees and people, through its practical workings, are made acquainted with the real scope and requirements of the act, and the manner of performing the duties it imposes, they are becoming generally satisfied. To so great an extent is this true, that many who at first were the most uncompromising in their opposition, now claim to be among the firmest friends and strongest advocates of the law. In making thus prominent the great interest manifested in the cause of popular intelligence since the passage of the new school law, it must not be understood that we before were making no progress, nor that the present interest is entirely due to the workings of this law. For the past fifteen years New Jersey has had the benefit of the active labors of many noble friends of education, and her system of public instruction during that time has probably improved as much as that in any other State in the same time. The establishment of the State Normal School has also contributed much to the progress we have made and are now making in the great cause of public education.

But we are again upon the eve of another legislative session, and the question, which is of special interest, is, shall any amendments be made to the law. It is my firm conviction that it should not be amended at the present, in any particular, that will in any degree cripple its workings, or change the cardinal principles upon which it is founded. The workings of the law have thus far been smooth and satisfactory, and the promised results, when in its full working, are rich and encouraging. How reasonable, therefore, the request that it should remain as it is until it has had a fair trial. Judging from the change in public sentiment during the past six months, we may certainly expect that next year will witness increased satisfaction.

But while we would advise the people not to condemn the law, or desire a change, before its provisions are fully tested, we would also remind them that they may expect too much from its practical workings. No legislative enactment, however just and perfect, has power at once to lift a people from low to exalted ideas of education, any more than the Bible alone can at once make all men Christians. There is work to be done, old prejudices are to be removed, new interests are to be awakened, liberality is to be cultivated, higher and nobler conceptions of education are to be entertained, before the benefits of any school law can be realized, appreciated or enjoyed. The work of education is a work of reform, and all reforms need time.

In my remarks upon the workings of the school law, I regret that

so little reference can at present be made to statistics. The amount of interest manifested in the cause of education ; the condition of our public schools ; the efficiency of our school system ; the work performed by our school officers ; and the practical workings of our school law can only be learned by reference to reliable statistical information relating to the cause of education in the State. The greatest defect of the old law was that a great portion of the statistics obtained were mere approximations. The provisions of the new law, however, are such that when fairly complied with, full and reliable statistical information relating to our public schools can readily be obtained, and satisfactory annual reports can be given. Such a report, however, cannot be furnished this year. At the expiration of the year for which the county superintendents have made reports, none of these officers had been in office more than four months, and some of them only two weeks. The new law requires each teacher to keep a school register, in which are recorded the attendance of children and other important items of information, but as such registers have not heretofore been kept, and as those which have been supplied can only furnish the required statistics at the end of the next school year, it will readily be seen how meagre must be the information which the county superintendents, during the short period they have been in office, could gather, to incorporate in their present annual reports. Hence the few statements which I desire to make at this time relative to the practical workings of the school law, must necessarily be of the most general character.

The plan provided for in the new law of apportioning all school moneys among the several school districts in the ratio of the number of children between five and eighteen years of age in each, makes it necessary that the school census should be correct. It affords me pleasure to state that this census has been taken. I believe it may be relied upon as entirely accurate. No difficulties will therefore be experienced in making correct and satisfactory apportionments of school moneys next year.

There is probably no better criterion by which we may judge of the interest the people take in the cause of education than the amount of tax they voluntarily impose upon themselves for the support of public schools. These school are supported by funds derived from three sources :

First—By moneys appropriated by the State.

Second—By the interest of the Surplus Revenue.

Third—By voluntary tax.

The amount of the State appropriation is determined by the Legislature and remains nearly the same from year to year.

The interest of the Surplus Revenue is a fixed sum.

The amount of voluntary school tax, within certain limits, is whatever the people determine upon. In sections where but little interest is taken in education, this amount is small, but in the cities and in those sections of the State where more interest is manifested, the people pay a proportionally larger amount of school tax. In the same manner as we compare the degree of interest the people of dif-

ferent localities take in public instruction by the amount of school tax which they voluntarily pay, so we may compare the interest manifested in the whole State at different times by the amount of tax paid each year.

In order, therefore, to compare the interest which the people have manifested at different times, and also to determine the effect the school law has had in increasing this interest, I will give the amount of school tax paid in the State for several successive years :

The amount of school tax paid in 1857 was	\$317,184 93
“ “ “ 1858 “	338,160 06
“ “ “ 1859 “	353,275 12
“ “ “ 1860 “	353,252 06
“ “ “ 1861 “	385,031 29
“ “ “ 1862 “	368,966 39
“ “ “ 1863 “	403,190 71
“ “ “ 1864 “	427,067 14
“ “ “ 1865 “	486,878 23
“ “ “ 1866 “	506,662 60
“ “ “ 1867 “	725,664 09

The increase of tax for 1858 was	\$20,975 13
“ “ 1859 “	15,115 06

The decrease “ 1860 “	23 06
“ increase “ 1861 “	31,779 23
“ decrease “ 1862 “	16,064 90
“ increase “ 1863 “	34,224 32
“ “ “ 1864 “	23,876 52
“ “ “ 1865 “	59,811 91
“ “ “ 1866 “	19,784 46
“ “ “ 1867 “	219,001 49

The total increase from 1857 to 1866 (ten years) was	\$189,477 67
--	--------------

The increase from 1866 to 1867 (one year) was	219,001 49
---	------------

Thus it appears that the increase of school tax assessed during the past year since the passage of the new school law has been \$19,523 82 more than the whole increase for the previous ten years.

Nor can this increase be said to be due to any compulsory provision in the law. The minimum amount of school tax which each township is required to raise under the new law is, two dollars per child. During the year 1866, the amount of township school tax raised in the state, was \$506,662 60; the whole number of children was 216,601. Thus it will be seen that under the old law, we were already taxing ourselves more than two dollars per child, the minimum amount required by the new law. The amount now raised throughout the state, is a little more than three dollars per child.

No more conclusive evidence than this, it appears to me, can be given of the good effect the school law has had in awakening the people to a greater interest in the cause of education. The desire of making the schools entirely free, is becoming general, and it is cer-

tainly not unreasonable to suppose that it will not be many years before "tuition fees," that great barrier between poverty and education, will not be known in the state. Let the interest now manifested in the cause of education continue, and before three years have passed, all the public schools in the state will be free, and New Jersey will have a system of public instruction second to none in the Union. The expenses incurred in supporting a free system of education are willingly borne by the people; it will not be many years, however, before our schools can all be supported without taxation. It is well known that there are lands of immense value, belonging to our state, now lying under the waters of the Hudson river and the New York bay, which if properly disposed of by our Legislature will yield a revenue sufficient to enable every school district to have a free school. This revenue must increase from year to year. The first object to which it should be applied, is the extinguishment of our state debt; when that is paid, which need require but a few years, this revenue should be exclusively appropriated to the support of *free public schools*, and the people relieved from school tax.

County Superintendents.—The whole success of our system of public instruction, depends upon our securing the services of competent, energetic and faithful County Superintendents. To accomplish this all important object, only two conditions are necessary: 1st, men must be selected without regard to their political affiliation, or to any other consideration than their fitness for the work; 2d, sufficient compensation must be allowed to enable them to make school supervision their first and only duty.

At present, we are paying our County Superintendents but little more in the aggregate, than was paid under the old law to our Town Superintendents, and County Examiners. There were two hundred and twenty-eight Superintendents in the state, and forty-two County Examiners. These officers received about fifty dollars each, making an annual expense to the state of \$13,500. The amount paid our County Superintendents last year, was \$15,657 50, making a difference of only \$2,157 50. And any one who is capable of judging, will readily agree, that for the amount we are now paying for school supervision, we are receiving, at the least calculation, ten times the amount of work calculated to improve our schools, than ever before.

The salaries allowed our County Superintendents, are confessedly inadequate. They range from five to twelve hundred dollars, making an average of only \$745 a year for each. Out of this small sum these officers must pay all the expenses incurred in the performance of their duties. The policy of paying low salaries, if long continued, will have the tendency to fill the office with incompetent men, and to invite neglect of duties. The County Superintendents, now in office, are men eminently fitted for the position; ability, energy, good judgment, faithfulness and official promptitude, have characterized them all, and this, too, under the disheartening circumstances of new work and poor pay.

Individual members of several of our Boards of Chosen Freeholders

have expressed a willingness to make appropriations to pay the expenses of the County Superintendents. If such action could be taken by the Freeholders it would be far preferable to any legislative action upon the subject.

In regard to this whole matter of compensation, both of superintendents and teachers, I have full confidence that the subject will be met in a right and liberal spirit, as fast and as far as the system works itself with the confidence and affections of the people. But it must be, and it ought to be a work of time. There is no cause for which the people will pay more liberally or more cheerfully, than for good schools, and whatever is needed to make good schools, when they are fairly convinced that they are likely to get the article they pay for.

Examination of Teachers.—Our system of granting to teachers certificates of different grades is producing most beneficial results. Teachers are thereby classified, and the people have the means of discriminating between their relative merits. The examinations induce the teachers to improve themselves, and hence the average grade of qualification is elevated. The elements of generous ambition and rivalry are stimulated and a worthy personal pride is enlisted.

Corporal Punishment.—In regard to the section in the law prohibiting corporal punishment, there is a great diversity of opinions. Some County Superintendents represent that the discipline in the schools has improved since the use of the rod has been abolished; others say that disorder and insubordination among pupils has been the result. The time will come, I hope, when corporal punishment will no longer be inflicted in schools; but it is doubtful whether we were prepared for prohibitory legislation upon the subject. With many teachers, simply the right to use the rod enables them to dispense with its use. Take away from them this right, and inform the pupils of the fact, and by that very act you make its use necessary. Since New Jersey, however, has taken the initiatory step on this subject, and as the teachers have been able to dispense with the rod for one year it may be well to let the section remain. If it does remain, however, there certainly should be no exceptions in favor of the cities. That was inconsistent legislation which gave to the teachers of the cities a right which was denied to the teachers in the country. If the rod is necessary to preserve order in school, all teachers should have the right of using it; if its use is unnecessary, its prohibition should be general.

Singing in School.—The clause in the law prohibiting singing as a part of the religious exercises of the school, has created extensive dissatisfaction. As, however, it does not prohibit singing as a part of the regular exercises in school, which are distinct from the religious exercises, its retention or repeal is of but little consequence.

Denominational Schools.—Efforts are being made by some religious denominations to obtain a portion of the public funds, for the support of their sectarian schools. If this privilege is granted to one denomination, it will be a gross act of injustice not to grant it to all, and it

needs no argument to show the injurious effect this would have upon our public schools.

Our Legislature last winter, wisely refused to recede from the position taken the year before, directing that the public school funds should only be used for the support of *public* schools.

If we would make our public school system as efficient as possible, it must be kept free from politics and the church.

Taking the law as a whole, it has been found quite complete. Its practical workings have not revealed any serious defects or omissions. During the past year, about five hundred controversies and disputes, relating to school matters, have been settled by decisions upon the construction of the law. All these decisions have been given in strict accordance with the letter, or the plainest meaning and intent of the law, and all of them, with but one exception, as far as I have learned, have been accepted by the parties in dispute, and the difficulties have been settled without resort to litigation, and it is certainly remarkable that no peculiar conjunction of circumstances in connection with our schools, has occurred, which has shown the necessity for the addition or alteration of any section. Since the law, therefore, has thus far answered so well the purpose for which it was framed, and as sufficient time has not yet been given to fully test all its provisions, it seems but reasonable to ask the Legislature that the law should undergo no alterations, and that no additions should be made this winter. That the law can be improved, there is no doubt, but when another year has expired and its provisions are fully tested, then such changes as may be thought desirable, can readily and wisely be made.

METRIC SYSTEM OF WEIGHTS AND MEASURES.

It is highly probable that the systems of weights and measures now in use will soon be superseded by the metric system. In all the countries of Europe and in many parts of South America efforts are being made to introduce this system. There is but little doubt that in a few years the metric system of weights and measures will be recognized as the lawful standards throughout the civilized world, and will be used in all business transactions.

In 1866 Congress authorized the use of this system throughout the United States, and provided for its adoption in the post-offices of the country by the passage of the following bills and resolution :

A BILL TO AUTHORIZE THE USE OF THE METRIC SYSTEM OF WEIGHTS AND MEASURES.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That from and after the passage of this act, it shall be lawful throughout the United States of America to employ the weight and measures of the metric system ; and no contract, or dealing, or pleading in any court, shall be deemed invalid or liable to objection, because the weights or mea-

asures expressed or referred to therein are weights or measures of the Metric System.

SEC. 2. *And be it further enacted*, That the tables in the schedule hereto annexed shall be recognized in the construction of contracts, and in all legal proceedings, as establishing, in terms of the weights and measures now in use in the United States, the equivalents of the weights and measures expressed therein in terms of the Metric System; and said tables may be lawfully used for computing, determining and expressing in customary weights and measures the weights and measures of the Metric System.

A BILL TO AUTHORIZE THE USE IN POST-OFFICES OF WEIGHTS OF THE
DENOMINATION OF GRAMMES.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Postmaster General be and he is hereby authorized and directed to furnish to the post-offices exchanging mails with foreign countries, and to such other offices as he shall think expedient, postal balances denominated in grammes of the Metric System; and until otherwise provided by law, one half ounce avoirdupois shall be deemed and taken for postal purposes as the equivalent of fifteen grammes of the metric weights, and so adopted in progression; and the rates of postage shall be applied accordingly.

JOINT RESOLUTION TO ENABLE THE SECRETARY OF THE TREASURY TO
FURNISH TO EACH STATE ONE SET OF THE STANDARD WEIGHTS AND
MEASURES OF THE METRIC SYSTEM.

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby authorized and directed to furnish to each State, to be delivered to the governor thereof, one set of the standard weights and measures of the Metric System, for the use of the States respectively.

The National Academy of Sciences in the City of Washington earnestly recommend the early introduction of this Metric System.

The following resolutions have been passed by that body:

IN SESSION AUGUST 10, 1866.

1. *Resolved*, That the National Academy of Sciences has heard with great satisfaction the passage by the Congress of the United States of a law authorizing the employment of the metrical system of weights and measures. That in the opinion of the Academy such legislation is honorable to our country, as identifying it with the scientific progress of the age.

2. *Resolved*, That the National Academy of Sciences earnestly recommend to the State officers having charge of the subject of public

education, to require the employment of the metrical system in works on Arithmetic and other branches of science taught in the public schools, and to take such other measures as may insure the introduction of the system, by educating the people to appreciate its advantages.

IN SESSION JANUARY 26, 1867.

3. *Resolved*, That the National Academy of Sciences is deeply impressed with the importance of educating the community, and especially the youth of the country, in the principles and use of the metrical system of weights and measures now permissively established by law.

4. *Resolved*, That in the opinion of the Academy no measure promises so certain success to this end as the introduction of the study of the system into the common schools of the country, and the explanation of the system to school teachers by competent persons.

5. *Resolved*, That it be recommended to Universities and Colleges to make the metrical system of weights and measures a subject of examination, and a necessary qualification for admission to these institutions.

6. *Resolved*, That the Academy considers it highly desirable that the discretionary power granted by Congress to the Postmaster-General to use metrical weights in the Post-offices be exercised at the earliest convenient day.

The perplexities and embarrassments involved in memorizing and using our present system of weights and measures, are so great that it cannot be expected to remain in use much longer. This system multiplies rules, introduces intricate mathematical calculations, increases the labors of both teachers and scholars in our schools, absorbs time which might be more profitably applied to other studies, increases the cost of education and the perplexities of business transactions. In the table of lengths, we have the ratios 12, 3, $5\frac{1}{2}$, 40, 8 and 3. In weights, we have three distinct series—Avoirdupois, Troy and Apothecary's. In these three tables, the only comma unit is the grain. In the first, the factors are 27, 11, 32, 16, 16, 25, 4 and 20; in the second, they are 24, 20 and 12; in the third, 20, 3, 8 and 12.

In measures of capacity, we have two liquid measures, a dry measure, and a cubic measure, with no convenient relations existing between them.

In the metric system for all the tables there is but one factor, one ratio, viz 10. With this system in common use, all the ordinary transactions of trade could be computed by any person familiar with the simplest relations of numbers, without the aid of pen or pencil.

Before the change from the old system to the new is effected, the children attending our schools should be made thoroughly familiar with the principles and the nomenclature of the new. I most earnestly recommend the Superintendents make themselves acquainted with this system, and that they be requested by the State Board of

Education to see that its study is introduced into all of our public schools.

THE QUESTION OF TAXATION FOR SCHOOL PURPOSES.

Have we a Right to Tax the people for the Support of Public Schools. This question lies at the foundation of our system of public instruction. If answered in the negative we must close our schools and depend upon private enterprise for the education of our children; if answered in the affirmative, then we not only have the right of imposing a school tax, but that tax may be made sufficient to keep all of our public schools entirely free.

A state is justified in taxing its people to support a system of education only so far as that education increases public prosperity and becomes a public good. Suppose Mr. A. has property but no children, has the state a right to tax Mr. A. for the support of public education? Yes, provided the public prosperity is thereby increased to such an extent that the benefit received by Mr. A. is a fair and full return for the amount of money he is called upon to pay, and not otherwise. A state has no more right to exact money of its citizens without returning an equivalent than an individual has of his neighbors.

Education is of two kinds, Common and Professional. Common education is limited to those branches of which a knowledge is necessary in the pursuits of the ordinary occupations of life, and should be possessed by every individual in the community. Professional education includes only a knowledge of those branches which pertain to a particular calling in life, and is possessed by only a portion of the community. Professional education is not a proper object for public expenditure. One man spends seven years in preparing himself to plead at the bar; another spends the same length of time in a machine shop in order that he may be an accomplished mechanic. The course of preparation for these particular occupations in life should no more be an object of public concern to be paid for by public tax in the one case than in the other. But common education is a public necessity and a public benefit, and therefore it is a proper object for public interest and public legislation.

The wealth of a nation is in proportion to the industry of the people, and it is education that promotes this industry. Ignorant men are generally indolent, simply because they neither know the benefit nor are they able to accomplish the results secured by industry. The savage is satisfied with his rude condition because he is too ignorant to comprehend how it may be bettered or what advantages a better condition will secure. Man will only labor in proportion to the benefits that labor confers, and the benefit conferred is in proportion to the kind and degree of the knowledge possessed. Thus we see that intelligence promotes industry, and that ignorance begets indolence.

Education also directs industry so that the greatest results are obtained.

In general it is evident that the success of every man pursuing any

business calling will depend to a great degree upon his knowledge concerning the department in which he labors, and to the proper use he makes of that knowledge

But education to be of the greatest benefit must be universal. A man who sustains business relations with a community must not only be educated himself, but every man with whom he has dealings must understand the elements of learning. If he is surrounded by and can only have dealings with a people ignorant and indolent, however extensive his own acquirements and genius may be, there is no demand for the products of his industry nor is there anything manufactured or produced which he can receive in return, to make those products beneficial to himself. Every intelligent being engaged in any business whatever is daily receiving dollars and cents from the industry incited and promoted by the intellectual culture of his neighbors and of all those with whom he has dealings either directly or indirectly. We can thus readily see why every man should be interested in having every other man educated, and why popular intelligence should be provided for by the government.

But not only is a business man benefitted by the intelligence of the community in which he resides, but the amount of that benefit is in proportion to the amount of property he possesses, or in other words, to the extent of the business relationship he sustains to that community. Suppose in a certain town there is an ignorant man, with five children, who by hard work at day labor, is barely able to preserve his family from perishing, and that at the free public school those five children receive a liberal education, and become industrious, enterprising members of that community. Suppose in the same town there are also two educated business men, the one worth \$10,000 and the other worth \$50,000. Who now are benefitted by the education and consequent industry of those five sons? The poor day laborer or those two men of wealth? The father, probably, has a degree of satisfaction in seeing his sons educated, but as far as dollars and cents are concerned, the poor man's revenue is not increased, his daily wages remain the same; while the men of wealth are benefitted, and that, too, in exact proportion to the amount of business their capital enables them to carry on. Just in proportion as a man becomes intelligent, as a general rule, he becomes industrious and rich, and in the same proportion his wants are multiplied and he is a better customer to all with whom he has dealings. *It is capital that is made more productive by education, and it is capital that should make education free. Poverty should be no barrier to intelligence.*

The effects of the ignorance of the laboring man is seen on every side. He does the poorest work and receives the lowest wages; his faculties are undeveloped and cannot be used; he is a dupe to the cunning and crafty, and a drudge to his employers; his house is the poorest and the least supplied with comforts; he makes but few purchases and as a customer he is of but little value to a community. The intelligent on the other hand has control over nature; capability to admire her beauties; to comprehend her wonders; to subdue her elements and make them minister to his comforts. He is king of

creation; he understands the laws of nature's forces, how they act and react upon each other; he rules the causes and secures desirable results. Men are prosperous, not in proportion to their surroundings, but according to the measure of thinking power that is developed within them. This is also true of communities. The glory, the power, the wealth of a State, is not in its rich soils, its productive mines, its extensive forests, its navigable rivers, but in its educated citizens. A State is rich not in possessing wealth, but in possessing that which is the producer of wealth.

Popular intelligence promotes popular morality. The ignorant throng our drinking saloons, commit our crimes, and fill our jails. Education is our natural remedy against the various crimes and dangers that surround and beset us. A common school education is the best temperance pledge a man can sign. It is the best preparation we can give children for the reception of religious truth. The school-master is the best reformer we have. Give him encouragement.

Let all the children of the State be gathered in neat, comfortable, convenient and well furnished school houses, with whole-souled, efficient teachers to give them proper instruction, and we will add more to the wealth and resources of the State, and to the happiness, the comfort, the prosperity, and the virtue of the citizens, than if a gold mine should be discovered on every farm. We want more vital thinking, we want more intelligent manhood, we want a community so educated that every member will be a producer and a value to the State. It is the work of the school room which is to maintain our institutions, perpetuate and perfect our government, and develop our vast resources.

We want public schools in every community, and by public schools I mean *free* schools; not schools *half-free* as we have them. Education should no more be bought and sold than air and water.

Let churches be built, let reform societies do their work, let all the agencies which have for their object the improvement of mankind be encouraged and supported, but there is one cause which is the foundation of all reform, the corner stone of our government, the charter of our liberties, the secret of our prosperity in the past and the hope of our stability and success in the future, and that is a common school education for the whole people in the whole land without regard to race, color, condition or sex.

E. A. APGAR,
State Superintendent of Public Instruction.

TABULAR STATEMENT CONCERNING THE PUBLIC SCHOOLS IN THE CITIES.

CITIES.

	Amount apportioned to the city out of State appropriation of \$100,000.	Amount appropriated from surplus revenue.	Amount of school tax levied by the city this year.	Amount received from other sources.	Total.	Amount expended during the year for building, purchasing, hiring, repairing or furnishing public school houses.	Whole number of children belonging to the city between five and eighteen years of age.	Amount of money received for the support of public schools for each child in the city.	Average number of children who have attended public schools during the year.	Number of public schools in the city.	Number of months the public schools have been kept open during the year.	Number of male teachers employed in the public schools.	Number of female teachers employed in the public schools.	Salary of male teachers per month.	Salary of female teachers per month.

CIRCULAR TO SCHOOL OFFICERS NO. 1.

Rules and Regulations adopted by the State Board of Education for the Government of School Officers, in conformity with the act "Establishing a System of Public Instruction," (Art. 1, Sec. 2, Clause 1).

OF COUNTY SUPERINTENDENTS.

1. It shall be the duty of each County Superintendent to visit every school in his county at least twice in each year, and oftener if practicable.

2. He shall note at such visits in a book provided for the purpose, to be designated "The Superintendent's Visiting Book," the condition of the school buildings and out-houses, the appearance and correctness of the records kept in the school registers, the efficiency of the teachers, the character, record and standing of the pupils, the methods of instruction, the branches taught, the text books used, and the discipline, government, and general condition of each school; and from the notes thus taken he shall ascertain and report the relative grade of merit of each school.

3. He shall give such directions in the science, art and methods of teaching as he may deem expedient, and shall be the official adviser and constant assistant of the school officers of his county. (School Law, Sec. 28).*

4. He shall distribute promptly all reports, forms, laws, circulars, and instructions which he may receive from, and in accordance with the directions of the State Superintendent.

5. He shall take care that the decisions of the State Superintendent, or of the State Board of Education, upon controversies relating to the school laws of the state, or to the rules and regulations prescribed by the State Board of Education, be complied with by the parties concerned; and in case such decisions are not complied with, he shall inform the State Superintendent thereof, and state the circumstances connected therewith. (School Law, Sec. 28).

6. He shall carefully preserve all reports of school officers and teachers, and all the examination papers of teachers examined by the County Board of Examiners, and generally shall carry out the provisions of the law "Establishing a System of Public Instruction," and the rules and regulations prescribed by the State Board of Edu-

cation; and at the close of his official term shall deliver to his successor all records, books, documents, papers and property belonging to the office.

7. No County Superintendent shall act as agent for any author, publisher, or bookseller, nor directly or indirectly receive any gift, emolument or reward for his influence in recommending or procuring the use of any book, or school apparatus, or furniture of any kind whatever in any public school; and any one who shall violate this provision shall be subject to removal from office.

8. He shall meet each Township Board of Trustees at least twice each year, which meetings shall be held at such times and places as he may appoint. (School Law, Sec. 40.)

9. He shall ascertain from the Township Collectors, within five days after the annual town meetings, the amount of school tax ordered to be assessed in each township, and on or before the first day of May of each year he shall apportion according to law to the several townships and school districts of his county all the school moneys to which they are entitled for the following year, whether received by State appropriation or ordered to be assessed as township school tax. (School Law, Sec. 21, 22, 23.)

10. He shall encourage and assist in the organization and management of County Institutes, and labor in every practicable way to elevate the standard of teaching and improve the condition of the public schools in his county; he, together with the City Superintendents, if any, of the cities within his county, may organize annually a Teachers' Institute in the county, when in his or their judgment such an Institute is likely to be well attended by the teachers, and can be so conducted as to advance the cause of education; the time and place for holding the Institute, the instructors, and the programme of exercises for the same, shall be such as the County and City Superintendents may agree upon, and as the State Superintendent may approve; the County Superintendent shall act as Treasurer and Secretary of the Institute, and shall receive the State Appropriation from the State Superintendent, out of which he shall pay the necessary expenses; a full report of each Institute shall be furnished by the Secretary to the State Superintendent.

11. He shall inquire and ascertain whether the boundaries of the school districts in his county are definitely and plainly described, and shall keep in his office a full and correct transcript of such boundaries, a duplicate of which he shall furnish to the State Superintendent of Public Instruction; in case the boundaries of any of the school districts are conflicting or incorrectly described, or for any good reasons should be changed, he shall, upon consultation with the trustees of the district concerned, harmonize, describe and change them, and make a report of such action to the State Board of Education; and on being ratified by said Board, the boundaries and descriptions so made shall be the legal boundaries and descriptions of the district of the county. (Section 24). After the boundaries of the districts of any county shall have been definitely determined by the action of the County Superintendent and the State Board of Educa-

tion, the County Superintendent shall proceed to renumber them from number one to a number equal to the number of districts in the county, inclusive; and no further changes shall be made unless the consent of the State Board of Education shall have been first obtained, as is herein provided. (School Law, Sec. 38).

I.—COUNTY BOARD OF EXAMINERS.

1. The County Superintendent, together with those whom he may appoint as County Examiners, will hold four stated meetings for the examination of teachers during each year, in such places in the county as are most convenient of access to the teachers. The first examination will be held on the last Friday in February; the second, on the last Friday in May; the third, on the last Friday in August; and the fourth, on the last Friday in November.

2. He will issue certificates of three grades, to be called respectively First, Second, and Third Grade County Certificates.

3. Candidates for the *Third Grade County Certificate* are to be not less than sixteen years old. No experience in teaching will be required. Applicants for a Third Grade Certificate will be examined in Orthography, Reading, Writing, Geography, Practical Arithmetic, and English Grammar. The license will continue in force for one year from date.

4. Candidates for the *Second Grade County Certificate* are to be not less than seventeen years old, with an experience in teaching of not less than one year. The examination will be the same as that for the Third Grade Certificate, with the addition of the History of the United States, Book-Keeping, and Theory and Practice of Teaching. The license will continue in force for two years from date.

5. Candidates for the *First Grade County Certificate* are to be not less than eighteen years old, with an experience in teaching of not less than two years. The examination will be the same as that for the Second Grade Certificate, with the addition of Physiology, Natural Philosophy, English Composition, Algebra, the Constitution of the United States, and the School Law of New Jersey. The license will remain in force for three years from date.

6. An entire new set of questions will be prepared for each County examination, under the direction of the State Superintendent, and ten questions will be given to each study.

II.—STATE BOARD OF EXAMINERS.

1. The State Board of Examiners, consisting of the State Superintendent of Public Instruction and the Principal of the State Normal School, will hold two examinations during the year, in January and June, at the State Normal School, in Trenton.

2. This Board will grant certificates of three grades, to be called respectively, First, Second, and Third Grade State Certificates, the third or lowest grade ranking one degree above the highest grade issued by County Boards or Examiners.

3. Candidates for the *Third Grade State Certificate* are to be not less than nineteen years old, with an experience in teaching of not less than three years. They will be examined in the following branches, to wit: Spelling, Reading, Penmanship, Book-Keeping, Geography, English Grammar, Arithmetic, Algebra, Geometry, Trigonometry, History and Constitution of the United States, General History, Rhetoric, Mental Philosophy, Literature (English and American), Natural Philosophy, Chemistry, Geology, Botany, Physiology, Theory and Practice of Teaching, and the School Law of New Jersey. The license will remain in force for four years from date. Normal Graduates who have received their diplomas will be entitled to this certificate without examination. Normal Graduates who have not yet received their diplomas will receive, without additional examination, a temporary license, which will remain in force for one year.

4. Candidates for the *Second Grade State Certificate* are to be not less than twenty-one years of age, with an experience in teaching of not less than four years. The examination will be the same as that required for a Third Grade Certificate. The license will remain in force for five years from date.

5. Candidates for the *First Grade State Certificate* are to be not less than twenty-five years old, with an experience in teaching of not less than five years. The examination will be the same as that required for the Second or Third Grade Certificate with the addition of any three of the following works that each candidate may choose, namely: Well's Graded Schools, Abbott's Teacher, Barnard's American Pedagogy, Barnard's American Normal Schools, Herbert Spencer's Education, Wickersham's Methods of Instruction, Wickersham's School Economy, Russell's Normal Training, Jewell's School Government, Emerson and Potter's School and Schoolmaster, Sheldon's Elementary Instruction, Ogden's Science of Teaching, Northend's Teacher's Assistant, Northend's Teacher and Parent, Sewell's Principles of Education, and Burton's Culture of the Observing Faculties. Each candidate will also be required to deliver a lecture to a class on some subject previously assigned by the Examiners, and to draw up a plan for organizing the schools of some large city. The license will be good for life.

III.—GENERAL INSTRUCTIONS RELATING TO BOTH COUNTY AND STATE CERTIFICATES.

1. With the exception of Reading, Vocal and Instrumental Music, Elocution, Drawing, and School Gymnastics, all examinations are to be conducted in writing.

2. Upon each Teacher's Certificate will be written the special average in each study, and the general average, each marked as a percentage upon the scale of 100.

3. Special average will be given for correctness in Orthography and Composition, and for neatness, order, and general appearance of the Examination Papers.

4. Special credit marks will be allowed for ability to teach Music, Drawing, Elocution, and School Gymnastics.

5. No license will be granted to a teacher whose general average falls below 70, or whose special average in any one of the studies required for the Third Grade County Certificate, shall be less than 70.

6. All candidates are required to furnish testimonials from School Trustees or other responsible persons, as to their moral character, and as to the time and place in which they have taught, and their success therein.

7. The Second and Third Grade County Certificates will be good only for the county in which they are issued. The First Grade County Certificates, and all State Certificates, will be good for all parts of the State.

8. All certificates will be liable to be revoked for cause.

APPENDIX.

REPORTS OF COUNTY SUPERINTENDENTS.

ATLANTIC COUNTY.

C. WRIGHT, SUPERINTENDENT.

The following statistical matter, compiled with the reports of the several District Clerks, is as near correct as possible under existing circumstances. My time has been too limited since entering upon the duties of Superintendent to admit of that thorough investigation of School matters as I hope to be able to give ere another school year shall have elapsed.

Only some six or eight schools in the county were in session subsequent to my appointment till after the close of the school year 1867, concerning which I know but little, except that they are among the best in the county. As yet, my time has been wholly occupied with the duties required outside of the school room; hence I am unable to give any definite information relative to the condition of the schools; but from the fact that so few of them have been in session the past summer, it occurs to me that there must have been a lamentable want of interest on the part of the county relative to the subject of education. I am happy, however, in the belief, founded upon the fact of a general manifestation of anxiety on the part of the Trustees in our recent meetings of the Township Boards, to co-operate with the Superintendent and each other, that a fresh impetus will be given to the cause under the new order of things, such as will put Atlantic county among the foremost in the State in putting the car of education on the right track.

Appropriated by Gloucester Farm and Town Association to Egg Harbor City,	1,229 98	
		\$15,955 92

Leaving a balace which the Districts have raised by District Tax and Tuition Fees of \$7,644 89

In addition to the above, please allow a suggestion in behalf of those districts in which it is impossible for the schools to be kept open the five months required by law with the amount of public funds appropriated to them, and the inhabitants thereof feeling their circumstances too limited to enable them to meet the requisite salary of teachers by tuition fees. But very few districts, if any, will allow themselves to be taxed for salary purposes so long as it takes a two-third majority to authorize an assessment upon the district ; whereas I have reason for believing that *some* would, in case they could be allowed to authorize such assessment by a majority vote. An amendment of Section 80 of the new School Law to this effect would, in my judgment, be of great advantage to many of our small districts, the children of which, as now situated, are deprived of equal advantages with larger districts. It is, indeed, unfortunate that inequality of advantages should exist at all ; but if they must exist, we ought, at least, to give those laboring under minor advantages an opportunity to improve them if possible.

BERGEN COUNTY.

ALEXANDER CASS, SUPERINTENDENT.

In rendering this my first report, I regret that it is out of my power to make it so full as the law requires, and as I desire to have it. The inauguration of an entirely new school law, so far as it rests with the County Superintendent, I find to be a difficult task. The hearty co-operation of trustees and other officials is wanting. It is not prompt and regular. This may, in part, be owing to the fact that the copies of the school law, sent to me for distribution, were not received until after the district meetings were held on the first Monday in September last. They, together with the school registers have since been distributed to every district in the county.

In conformity with your instructions, I have made several appointments of trustees to fill vacancies, and appointed district clerks in all cases of failure of trustees to make them. I have had some difficulty and more delay in acquiring from the late Town Superintendents the census of children of legal school age, in the several districts of their respective townships, on which to base my apportionments of this year's moneys. Three out of the nine townships composing this county are still delinquents, and I know of no method of compelling the Superintendents to furnish the needed reports. In most instances the Town Superintendents had deposited their books and papers with the township collector, but I have found it to be just as troublesome to collect from the collectors as from the Superintendents. So thus far, I have been unable to make apportionments to the districts. The apportionments to townships have been completed. There is great irregularity in the reports made by the district clerks, they failing in one particular or another, make it impracticable for me to make my report as the law requires. Before the expiration of another year I have no question but that all our school officers will be drilled to their point of duty.

The embarrassments I have mentioned are not to be attributed to any fault of the existing law, but to the fact that this as well as any other new law, works slowly until it is fully comprehended and fully put in operation. The transition from one state of things to another

naturally carries with it more of the remembrance of the past than the requirements of the future.

The following is a copy of the census of children reported by the district clerks of the several school districts in each of the townships of Bergen County, August 31st, 1867.

BURLINGTON COUNTY.

JAMES E. GRIFFIN, SUPERINTENDENT.

I was appointed County Superintendent of Burlington county by the State Board of Education, on the 25th of April last, and confirmed by the Board of Freeholders at their first meeting thereafter, May 6th. According to a resolution of the said board, my appointment dates from the 1st of May, 1867. All progressive reforms in their incipency, meet with much opposition. The opposition to the new school law in this county, was at first very violent, owing to a misapprehension of its requirements; but since the people have read the law, and become more or less conversant with its provisions, a great change has taken place in public sentiment, and many, who at first opposed it, like true men, perceiving that they had been wrong, have become its warmest friends. The opinion now, amongst men of broad and comprehensive views, is that the law will prove an incalculable blessing to New Jersey. I speak of the law as a whole. Some of its minor provisions could be altered for the better. So far as I can ascertain, the feeling prevails throughout the county, that attendance at school should be made compulsory between the age of five and fourteen; that the State should provide the money to keep the schools entirely free for a certain number of months in the year; that thorough elementary instruction, in branches specified by law, should be guaranteed to every child of the Commonwealth; that every child, having passed through certain grades of instruction, and having remained a definite period of time in the public schools, should graduate from them, and receive a certificate of graduation. Having done this, the State would have done its duty to the child, leaving the imparting of a higher education to private institutions of learning.

The public mind throughout this county has been completely awakened to the importance of a higher standard of education than we had prior to the passage of the new law. Educational matters are being discussed in all parts of the county, notwithstanding the political excitement. Men feel that something must be done; and now is the time to do it. There is not a New Englander, or an educated German, to my knowledge, in the county, who is not a warm

friend of the new law. The opposition comes principally from men who have no children to educate, and heavy taxes to pay; or who are misled by sectarian or party prejudices. Time will overcome this feeling, and allay all prejudice. By authority granted in the fortieth section of the school law, I called meetings of the township trustees to appoint district clerks, and proceeded to organize under the new law.

I have spoken about twenty-five times on education and the new law in various parts of the county; and have everywhere found the trustees gentlemanly men. In some parts of the county there are trustees who cannot read and write, but these very men are the warmest friends of education, for they feel its want. One gentleman very truly remarked, "that he hoped the day would soon come when they would not be required to ask the party elected to a township office, as they are compelled to do now, if he can read and write." The school-houses, generally, are in a poor condition but the trustees are repairing them, and providing them with black-boards; and new life seems instilled into everything pertaining to the schools.

All the townships have raised the money required by law, except two. I have apportioned all the money to those complying with the provisions of the law. I think we are progressing remarkably well, when we consider the former deranged condition of the school matters. In another year, we feel confident, there will be a harmonious and concentrated co-operation on the part of all. Many, who have been teaching in the public schools, we have found, upon examination, to be deplorably incompetent. In our examinations we have been as fair and impartial as possible. No puzzling or perplexing questions were propounded; but we have endeavored at all times to ascertain the qualifications of the applicant. About one hundred and thirty certificates have been granted, and private examinations are held at any convenient time. We have given but few first and second grade certificates. There is a lack of thoroughness on the part of a large portion of the teachers.

They do not grasp the subjects as masters of the studies which they pretend to teach; but this condition of things will be changed. They are going to work with ardor and zeal. We will soon have better trained, better qualified teachers in the schools. They see that it will be necessary for them to study, to think, and to reason, in order that they may be prepared for their arduous and important labors. In accordance with the provisions of the law, I appointed the following gentlemen members of the board of examiners for the county: Prof. William Hutchinson, Principal of the Academy at Pemberton; Mr. Wilbur Watts, Principal of High School at Burlington; and Mr. Freedom C. Lippincott, of Marlton. These gentlemen are men of liberal attainments and generous sympathies, and they will endeavor to make each examination as fair and practicable as possible.

No teacher has been charged an examination fee, but the county paid the three members of the board for fifteen examinations, held in various places most convenient for those who wished to be examined. Some persons complain about the expense of the new law; but they do not consider that if the requirements of the old school law had

been fulfilled, it would have cost the county more than the new law. Thousands of dollars have been squandered through the employment of incapable teachers and the want of proper organization in the schools. There has been a universal complaint in regard to the want of uniformity in the text books of the schools. The new law provides for the introduction of a uniform series of text books. This difficulty is being remedied. For the last four months I have employed a large portion of my time in examining the different educational works published in the United States with a view of recommending a series of books for the schools of the county.

For some time, I thought of calling a meeting of the trustees of the county to agree upon a uniform series; but after consultation with many of them, it was deemed best that the County Superintendent should make the recommendation without such meeting.

Altering and properly defining the boundaries of districts, has absorbed much of my time, and been a very difficult task; and it will require a considerable length of time before they can all be properly defined. The granting of this power to the County Superintendent, is a wise provision of the law; for in no other way would it ever be properly done. It will require several years to put the law in successful operation; but when it is brought to a higher degree of perfection, there is no doubt it will be productive of the most beneficial results. An impression is prevalent that the State exercises no control over the township and district moneys. This seems contrary to the whole spirit and tenor of the law, and at variance with the ruling of all former officers who have given decisions upon the subject, and seriously interferes with a prompt and faithful execution of the law.

In conformity with the 27th section of the school law, I appointed a time to examine applicants for entry into the State Agricultural College at New Brunswick. No one applied. There are three vacancies to fill from this county. Those reported should sustain a thorough examination in spelling, grammar, arithmetic including square and cube roots, and in algebra, as far as quadratic equations.

Since writing the above, I have received an application to enter the college. This is an excellent institution; and is doing great good in imparting a knowledge of agricultural chemistry and kindred studies.

Impelled by a conscientious desire to advance the cause of education in this county, I have so far labored laboriously to bring order out of chaos; and hope that the trustees of the different schools will vigilantly guard the educational interests committed to their charge, so that ample facilities may be afforded to the 15,719 children, between the ages of five and eighteen, for acquiring a thorough elementary education. We earnestly ask the co-operation of parents in carrying out the provisions of the law, so that success may crown our efforts, and New Jersey awake from her lethargy, and take a place among her sister States of the Union in the onward march of intelligence.

Whole number of children in Burlington county between the ages of five and eighteen, 15,699.

Whole number of public schools in the county, 167.

STATISTICS.

TOWNSHIPS.	No. of District.	Amount of money received from the State.	Amount received from surplus revenue.	Amount received from township tax.	Total amount received for the support of Public Schools.	Whole No. of children belonging to the district between 5 and 18 years of age.

CAMDEN COUNTY.

ALEXANDER GILMORE, SUPERINTENDENT.

The late period of my induction into the superintendency, has compressed the labor of *five* months into the narrow limits of *one*. The *second* instalment of the State Fund was already due, while the *first* had not as yet been apportioned. The time was at hand for the examination of teachers, as also the election of trustees.

Amid this pressure, it was difficult to decide *where* to commence. I selected, however, the work of communicating with the districts of the county, for which decision several reasons existed. I wished to convey information to the teachers respecting the time and place of examination, the interval being so short, that the most expeditious method must be adopted. The time for the election of trustees having been changed from April to September, and there having been no officer to communicate with the respective boards of the county, a lack of information existed in reference to the provisions of the law on that point. As a result of these circumstances there were many districts in which no arrangements had been made to secure those elections. I was on the ground at the opportune juncture, to set the machinery in motion for the accomplishment of that object.

The county being without a superintendent, delayed also the census of children. Notwithstanding you, sir, as State superintendent, ever faithful in your work, supplied the lack of the county officer as best you could, by sending the blank form for these returns, to the township officers to be distributed among the districts, yet when I entered upon my work, I found that, unfortunately, there were instances, in which, *whole townships* had failed to receive the documents sent. Where this failure had occurred, either in township or district, I supplied the blank form. I was dependent upon these census returns for the material from which to construct my *statistical* report. The *Financial* part also of my report embraces apportionments of school funds, based on statistics to be collected from twenty-two officers in *eleven* townships. Instead of being *in possession* of these Reports at that time, the *incipient steps* had only been taken, to *procure* them. These facts are presented to show the difficulties I encountered in accomplishing this work within the limited time at my disposal. These

visits to the districts, though made as expeditiously as comported with the proper discharge of the duties involved, were completed only the evening preceding the day appointed for the examination of teachers.

In entering upon this examination, I selected as my associates, Mr. Henry K. Bugbee, of Williamstown, and Mr. William Bryant, of Gloucester city ; gentlemen of distinguished ability as teachers, who have also, practically proved themselves to be eminently qualified for a position in the "County Board of Examiners." We have examined and licensed *fifty-one* teachers ; two of whom hold first grade certificates ; two, second grade ; and forty-seven, third grade. The teachers have entered upon their duties with ardor ; a spirit of emulation has been inspired by these examinations, and under the workings of the recently enacted system, they are looking forward to a more exalted position for themselves as educators, and a higher literary grade for the schools. As might be expected, there are *degrees* of proficiency discernible in the schools of the county : but in instances where two calls have been made, an improvement could be traced in the interval between my first and second visit. In calling the meeting of the township boards, the trustees are seconding the arrangements of the superintendent. These gatherings are anticipated with interest. I have no doubt that new zeal will be awakened by them. The teachers and trustees have labored in harmony with the superintendent, and are in sympathy with him in his efforts to promote the cause of education.

CAPE MAY COUNTY.

MAURICE BESELEY, SUPERINTENDENT.

In preparing my report, upon the condition of the schools of Cape May county, perhaps it will be instructive to revert back to their status, at the time of and for some years previous to the passage of the late act of March 21st, 1867.

Through the neglect of superintendents, trustees, parents and others, their usefulness could not be maintained, and they had relapsed, on the passage of the new law, into a chaotic condition which needed the genial influences of enlightened legislation to remove, and we trust hereafter to give new life and vigor to a system so worthy the exertions of the philanthropist, and so dear to the interests and welfare of every member of society.

The difficulty under the old law seemed to be a want of system. In the first place the Town Superintendents became very negligent in visiting the schools, many of them acting upon the principle that *they* were amply competent to take care of themselves, without their kindly aid and assistance, and to see a trustee in a school house was about as unlikely an event and as great an anomaly as to see a jew in a christian chapel. The parents of children have been equally indifferent. Formerly in this county some degree of interest was manifested by teachers holding examinations at the end of every quarter, when the trustees and people turned out "en masse," to hear interesting pieces, dialogues and other exercises by the children; which not only stimulated them in the acquisition of knowledge, but engendered a spirit of emulation amongst them conducive of much good. This state of things died out many years ago, and since that the schools have been almost solely, under the dominion of the teacher, who too often felt but little interest in their advancement, beyond the emoluments of his position. How was it possible, then, to obtain any reliable data, either financial or statistical, when the teacher kept no register, and made no report to the Township Superintendent? consequently the reports of the latter to the State Superintendent were based upon speculative and imaginary figures, rendering *his* annual return unsatisfactory to himself and the public; particularly as far it was founded upon the conjectures of the Town Superintendents.

To draw a parallel between the old and the new law, before a perfect organization of the latter shall have been effected, would not be proper at this time. Suffice it to say, however, the old law has been tried, and the new one has not; yet as the old one has signally failed, we have every confidence to believe the new will meet with the expectations of its framers and advocates; having been prepared evidently with much care and consideration. Should it have the effect as it doubtless will, to bring out correct reports from the teachers to the district clerks, and through them to the county superintendents, reliable information can be had for the State Superintendent hereafter, with which to perfect his reports. To say the act is perfect, would be to say that man is infallible. Let us wait patiently a reasonable time, and if any material defect should appear, it can be corrected. I consider one of its most efficient sections, that which makes it obligatory upon the teachers to keep a register, under a penalty of non-payment of salary. This salutary provision I had formerly urged upon the State Superintendent as a necessity, in numerous reports heretofore made, as Superintendent of the Township of Dennis.

You will find attached my financial and statistical reports up to the end of the fiscal year, September 1st, 1867, which embodies all the data that can be obtained at this time; our schools having been closed during the summer months. As a consequence in another year, they will be full and explicit. You will observe a new school house, is in progress of erection in the new district No. 10, in Dennis township, and a large and commodious one in No. 27, or Cape Island city. This will be the largest and most elaborate one, when finished, in our county, the tax only for a part of it being raised this year. As they have no board of education nor City Superintendent yet appointed, I have had, for the present, under the advice of the officials there, to embody their report in mine. In the county, some houses are being repaired, and some new ones are in contemplation. There are many good houses, and some nearly new, although too many of them are small, illy ventilated, and out of repair. As a general interest has been awakened since the diffusion of the new law amongst the people in reference to the condition of their school houses, it is to be hoped it will not abate until their renovation or rebuilding, shall have become an accomplished fact. It is worthy of remark, that to the credit of the district clerks of my appointment, every school district, from No. 1, commencing at Beesley's Point, in the north-eastern part of the county, to No. 27, at Cape Island, have been very promptly reported, with affirmations attached to their returns. Their reports at this time, contain but little except the number of children, which is nearly all in fact they had to communicate; the amount of money raised by tax having to be obtained from the township collectors, and the amount of surplus fund from Dr. C. F. Leaming, our loan commissioner. I will likewise add that Cape Island City has raised by tax for the payment of teachers salaries, \$4.60 per scholar; Lower township, \$3; Middle township, \$2; Dennis township, \$2.98, and Upper township \$3 per scholar, as based upon the number of children reported in April last.

Having recently been around the county, I have to say the duties of the county superintendent have been carried out, under the directions of the state superintendent, in as practical a manner as possible, under the circumstances of a new organization, and if this new law shall hereafter be the means, under Providence, of giving an impetus to the cause of education in the State of New Jersey, then the great end for which it was framed, will have been accomplished. This can only be brought about by the cordial co-operation and support of all the officials created by it, in vigilance and increasing watchfulness.

If *they* do their duty, it is not unreasonable to suppose that the blessings which will emanate from it to the rising generation will be felt and acknowledged in every district, township and county, of the glorious little State of New Jersey; pæans of thankfulness will go up from this happy multitude for her continued prosperity and advancement, in all time to come; and a veneration and pride of country will be instilled into their minds, enabling them to catch the inspiration of the poet,

“Where is the man with soul so dead,
Who never to himself hath said,
This is my own, my native land.”

CENSUS REPORT.

A statement of the number of children between the ages of five and eighteen years, in each district and township of Cape May county, as reported October 1, 1867.

CUMBERLAND COUNTY.

A. R. JONES, SUPERINTENDENT.

I received my appointment April 29. It was confirmed by the County Board of Freeholders, May 8. Soon after that I resigned my school and made arrangements for the work before me. For twelve years I had labored in the school-room, realizing that as a teacher I had many trials, in common with other teachers, caused in a great measure by the imperfect school system, and as I looked over the other States, and saw that they were far ahead of New Jersey, I wondered why New Jersey would not do something for her schools. While the Legislature legislates for railroads, turnpikes, &c., why not provide for the education of the thousands who are growing up rapidly, and will soon occupy our farms, our shops, our counting rooms, our school rooms, our pulpits, our legislative halls; but at last the work is begun.

The Legislature of 1866 gave us the State Board of Education, and the Legislature of 1867 gave us the "new school law." It was very natural that it should meet with opposition. Every *new movement* meets with opposition, every effort to get the wheels out of the old ruts will be opposed; railroads, steamboats, turnpikes, churches, schoolhouses, moral reforms of every kind, all are opposed. It is characteristic of some men to oppose everything, it is their nature, and I think we should feel kindly toward such. It *amuses* them, and does not *hurt* the onward march of everything.

"Onward, onward, ever. Human progress none may stay,
All who make the vain endeavor shall, like chaff, be swept away."

Knowing the nature of some men, and having implicit confidence in the sentiment expressed by the above lines, I felt nerved for the work. I was in earnest, and somewhat enthusiastic. I felt anxious that Cumberland county should be second to no county in the State. I think I realized it was a great work, that a person must give his whole time and attention to it, or else it would not be any advance over the township superintendency system, or the people would have another cause for dissatisfaction, if a man should make some business.

or profession primary, and the schools secondary. There seemed to be much opposition to the law, we could hear about it from every part of the county, and I must own, I felt some misgivings about my reception among the people.

BOARD MEETINGS.

In the month of June, I met the Township Board of Trustees, of every township in the county, after calling the board to order, by stating the fact that the school law constituted the trustees of each township, a township board of trustees, we then talked to them upon the following points: "The old law is good enough, we do not need a new one; the new law is arbitrary and tyrannical; it is a political measure; it is a Normal school concern." After endeavoring to meet those points, we organized the board by electing a Secretary, then proceeded to appoint district clerks, and to explain the practical workings of the law. We adjourned our board meetings until the month of September. During that month we had the pleasure of meeting each board the second time, and, perhaps, we can give the spirit of the meetings best by presenting the resolutions that were passed. We held the first of the second series of meetings at Vineland, Landis township: the meeting was quite full and very enthusiastic. The feeling among the people was so cheering and encouraging, that we felt proud of Vineland, and felt to pity those superintendents who have no Vineland in their counties. Judging from the spirit of the people, we concluded we should not have the best of the wine at the last of the feast; but we were agreeably surprised to find a good feeling throughout the entire county; much better than we found in our meetings in June, and we learned with pleasure, that we had good strong men to work with, men who might differ in regard to the practical workings of the school law, but who were in earnest in regard to the subject of education; they realized that we were behind other States, and that if we were true to ourselves, to our children and to the best interests of New Jersey, we would rise above all contention about the law; and if it is not what we want, we will labor as citizens of New Jersey to make it what we need, so that our State may rank second to none in the Union. The following resolutions were passed by nearly every board in the county:

Resolved, That our schools ought to be free.

Resolved, That we recommend Trustees to hire their teachers by the year.

Resolved, That we recommend a uniformity of books in each township.

Resolved, That we recommend Trustees to purchase the school books, and have them as the property of the district.

In many places the above resolutions were discussed with much spirit and earnestness, showing that the Trustees at least, are disposed to *wake up*. We cannot close this hasty and imperfect account

of these meetings, without referring to the universal kindness and hospitality of the Trustees. We gave notice that we wished to get well acquainted with each one, and we should expect to drive up to their houses, and if they did not wish us to come, they must put up notices! "Come on" said some, "you will not find any notices at my house" said others, and true enough, we have met with a cordial reception, beyond our most sanguine expectations, in every portion of our county, and it is now difficult to decide where we find the most earnest co-operation; and in concluding this part of our report, we would say that if we are not wonderfully deceived, we have the hearty co-operation of the Trustees of each district in the county.

EXAMINATIONS.

We held our first examination, the last Friday in August, and for the convenience of the teachers, it was held at the following places. for Hopewell, Stoe Creek and Greenwich townships, at Roadstown; for Fairfield, Maurice River and Downs, at Dividing Creek; for Pittsgrove, Landis and Deerfield, at Centreton. Mr. S. Culver, of Millville, attended at Roadstown, Mr. B. G. Ames, of Newport, was at Dividing Creek, and Mr. Charles Hampton, of Bridgeton, and myself, went to Centreton. Twenty were examined at Roadstown; thirteen at Dividing Creek, and twenty-five at Centreton. September 13, we held a special examination at Vineland, eleven were examined. September 25, held a special examination at Dorchester, two examined. September 27, at Vineland, two were examined. To sum up, seventy-three teachers have been examined, sixty have received certificates, and thirteen failed. Three received first grade, six received second grade, and fifty-one third grade. Forty-one were born in New Jersey; nine in New York; five in Pennsylvania; four in Maine; four in Massachusetts; three in England; two in Michigan; one in Iowa, one in New Hampshire; one in Connecticut; one in Rhode Island, and one in Hayti. The oldest is fifty-seven, the youngest sixteen. The greatest number of years experience, thirty; over sixteen and under twenty, fifteen; over twenty and under thirty, thirty-three; over thirty and under forty, five; over forty and under fifty, four; over fifty, two. We did not get the ages of the other fourteen. Ten have had no experience; over one year and under five, thirty-three; over five and under ten, seven; over ten and under twenty, three; over twenty, two. Our teachers are progressive and inquiring, and are anxious to learn aboutt he best method of teaching, governing, &c. We cannot conclude this report without returning our thanks to the editors of our county papers; these gentlemen have shown us much kindness in publishing our notices of examinations, &c. We feel very grateful to them for the general interest they have manifested in the cause of education, and however much they may differ with us in regard to the best means of securing to our State *free* schools, we must believe that they are warm friends of *good* schools. There are thousands in other States who are considering very carefully the soil, climate, geographical position of New Jersey, with a

view of making it their future homes ; will we not labor earnestly, faithfully and enthusiastically, if necessary, to make our system of free schools so thorough, that there shall be a straight way from the threshold of every dwelling, however *humble*, in the country, village or city, to the highest places of usefulness, influence and honor ; will we not as citizens of New Jersey, work for this grand and glorious result, so that we can say, with assurance, to *all* who are disposed to settle among us, we know we have the soil, climate, &c., and we have just as good schools as you leave behind you ?” “Come on with your enterprise, your energy, your industry, your capital.”

We think the teachers, trustees and patrons, are disposed to *wake up*, and give to the boys and girls of New Jersey, the best means of education ; we believe they are disposed to get out of the old ruts, the old beaten paths, and we trust they will not stop until they make education as free as the sunlight or the pure breezes of heaven.

“God scatters love on every side,
Freely among his children *all*.”

GLOUCESTER COUNTY.

WM. MILLIGAN, SUPERINTENDENT

SCHOOL HOUSES.

No new houses have been built during the year, but improvements long needed, have been made to the house at Woodbury, by the addition of two good sized rooms. The houses at Mantua and Thoroughfare, have been repaired, and the old fashioned long desks that would hold from six to eight, have been displaced by comfortable desks to accomodate two ; leaving a nice aisle between the rows (thus enabling the scholars to leave their seat without having to climb over two or three as formerly), and contributing very much to the order of the school. North Woodbury needs a larger house and more ground, unless it is consolidated with the South Woodbury District. The Chestnut Grove and Paul's District, have been consolidated, and they have built an addition to the house (which was a new one) belonging to Chestnut Grove. But the houses generally in this county, are very poor, some hardly fit for stables, and those that we have of the better sort, are sadly in want of proper ventilation, light and furniture. Out-buildings are generally poor, and many of the districts have but one for both sexes, to which subject I have called the attention of the trustees, and they have promised that it shall not be so at my next visit. The main evil I find in regard to our school houses is that they are used for religious and public purposes, such as town meetings. Political meetings are held in them, and in fact, every show that comes along, finds access to our school-houses. Most of these houses have been built by corporations or associations, with the understanding that the school and church meet in them ; the house goes to destruction, and the complaint is that the school commits the crime of destroying, and, vice versa, and the district refuses to be taxed to keep the property in repair, unless a deed is made to them in order that the house be used for no other than school purposes. In another district, they told me that a political meeting, those outside, made a bon-fire of the out-houses (to their shame be it said).

APPARATUS.

Our schools are very poorly supplied with black-boards, charts, maps, &c. It is utterly impossible to teach well without such helps; our leading schools are well supplied with black-boards, but we are sadly in want of globes and philosophical apparatus in our principal schools.

VISITATIONS.

I have visited thirty districts, and found very good order in all, except one, where it was owing to the want of proper qualification and training, and advised the teacher in charge, to attend our State Normal School. Quite a number of our schools were closed for the want of funds.

TEACHERS.

I have examined forty-two teachers. Thirty-five received third grade certificates; two, second grade; and five first grade. I found that the teachers knew nothing about map drawing, hence their marks in geography were low. Two of these third grade teachers I placed on probation until November, as they were engaged, and had taught part of their term. Many of our best teachers are leaving the profession on account of the poor remuneration they receive.

TEXT BOOKS.

The Township Boards have all met once excepting Franklin township, where there is very little interest in the cause of education, but there is a little leaven settling there which will bring about a better state of things. Deptford, Woolwich and Greenwich have adopted, and the others will soon, a uniform series. Since my appointment I have been very busy in appointing clerks, explaining the law, and visiting trustees. The new school law has operated so far to the awakening of a greater interest on the part of the people in regard to the system of public schools, and I think it will give us a better class of teachers. The section in regard to corporal punishment is condemned and the prevailing opinion is that some measure should be taken to compel the people to send their children to school. Quite a number of our people complain that the law imposes too much tax upon them, but I think that when our schools issue from the embryo state in which their great influence is now hid, that "Old Gloucester" will be equal to her sister counties in the great work of "Public Instruction." Give us more money to pay our teachers a salary that will keep some thing more than body and soul together, and we will give you better schools. If the state could give more money it would work better. Many of our best and most experienced teachers are leaving business every year, and seeking more remunerative employment. I

would suggest to *trustees* the necessity of discriminating more in favor of such, and holding out such pecuniary considerations as would induce them to remain in the profession.

COLORED SCHOOLS.

We have three in this county which are taught by ladies of their own color and I trust they will make greater progress than they have done. One is in Deptford, the others in Woolwich and Franklin townships. They are all small; the one in Deptford is at Woodbury, and under the control of *white trustees*, being a part of district No. 7.

MORAL INSTRUCTION.

The scriptures are regularly read in our schools, and other methods of moral instruction used as opportunities afford, but no text book on the subject is used, but might be I think in our graded schools.

SALARIES.

It is a difficult matter to report accurately the salaries of teachers. In some districts they hire the teacher by the day, the minimum being a dollar, and the maximum two dollars; others from three to four cents, according to the branches taught. If the pupil is absent nothing is received, but the teachers must be there. Now this is injurious to any district pursuing such a system. The highest salary received by male teachers per annum is \$800, and the lowest \$500. They should receive more than this when rents and living are taken into consideration, and the amount of labor they have in a graded school numbering from two to four hundred pupils. Our lady teachers receive (and I must say sometimes grudgingly) one dollar a day, and sometimes less than that. Now consider this; one lady that I know receives sixty dollars a quarter, pays forty-eight for board and washing. What is there left? The highest salaries that are paid are \$350 per annum, and where the work is equal to that of any grammar school teacher in our cities.

DISTRICTS.

A number of the school districts need consolidating, as they are so small that it is impossible to sustain anything like a good school. Some number only sixteen pupils.

* District No. 7 raised \$2,000 for Schools, \$3,000 for buildings. District No. 2 raised \$600—\$200 for Schools, \$400 for buildings.

† District No. 1 raised \$1,200 for School purposes.

HUDSON COUNTY.

WM. L. DICKINSON, SUPERINTENDENT.

I herewith submit my report as Superintendent of Hudson County, for the year ending August 31, 1867. The time has been so short since the enactment of the school law, and my appointment under the same, that very full and accurate statistics or very valuable information or suggestions concerning the operations of the law, can hardly be expected. Nevertheless the accompanying table of statistics is worthy of confidence in respect to the census of the children between the ages of five and eighteen, although the increase over the number reported last year, 3,374, seems very large. The number reported last year was much smaller than it should have been in some of the cities, on account of a misunderstanding of the questions contained in the blanks sent to the superintendents. The financial part of the tables is also correct, I believe, so far as it refers to the amount of money received from the State or from township tax. In some districts, no regular accounts have been kept of receipts and expenditures, and results are reached by "guess." We shall do better next year. In many schools no proper school registers have been kept during the year, and therefore the number of children reported as attending different periods of time from twelve months downwards, is not reliable. In this matter, also, we shall do better next year, if the new registers are kept according to law. The rest of the table is mainly correct, or, at least free from gross errors. An interesting fact connected with the schools of Jersey City and Hoboken, is the establishment of evening schools for the benefit of those who by reason of their age or avocations are unable to attend the day schools. During the last year the number of those who availed themselves of the benefit of such schools in Jersey City, was 1,138. Of these, 228 were adults, or above the age of eighteen years. I believe the State Board of Education has never called for any statistics concerning evening schools. Whether any such schools are established in the cities of other counties of this State, I know not. Here they are regarded with great favor, and will, no doubt, soon be established in all our

cities and large towns, where great numbers of children, otherwise, will never go to school at all, after they reach an age at which their labor becomes useful to their parents, this occurs often at the tender age of ten or twelve years.

In Greenville and West Hoboken, the school houses are reported as poor, small, unfit for use. It gives me pleasure, however, to say that these towns are making preparations to erect large and commodious buildings, which will be an honor to the cause of education. Jersey City is also erecting a large and expensive school house, which will, soon, no doubt, be followed by the construction of others. The desire of the people to have schools of a high order, and the willingness to be taxed for the same, are growing fast in most parts of the county. They recognize the truth that the greatest treasure of a State, is its children. If they are properly educated, all other advantages and possessions are increased to a manifold extent, if they are neglected, and grow up in ignorance, the wealth of the State is diminished, and its greatest blessings, liberty and equality, become its greatest curses.

The working of the new school law is attended with little or no friction. I believe the people are willing to try it faithfully and correct its faults as experience may dictate. Perfection cannot be reached at a bound, nor if it could, would grumblers acknowledge it, or be satisfied with it.

FINANCIAL SUMMARY.

TOWNSHIPS.	District.	Amount of money received from the State.	Amount received from Township Tax.	Amount received from District Tax.	Total amount received for the support of Public Schools.	Amount expended during the year for building, purchasing, hiring, repairing or furnishing Pub. School House.	Whole No. of children belonging to the District between 5 and 18 years of age.

HUNTERDON COUNTY.

JOHN C. RAFFERTY, SUPERINTENDENT.

Immediately upon the confirmation of my appointment I gave notice, by handbills and by advertisements in the county papers, of the holding of trustee meetings in the sixteen townships and boroughs of the county. By the 23d of May I had held nineteen meetings, filled the vacancies existing in the several boards of trustees and appointed one hundred and ten district clerks.

These meetings had a beneficial effect in dissipating some of the prejudices against the new law. I endeavoured to impress upon the minds of those trustees who met me, that the new law proposed but little that was new, but that its great object was to give life and vitality to provisions already existing upon the statute book, which from various causes had been allowed to fall into disuse. These meetings enabled me to obtain the post office address of the district clerks.

The different circulars and other printed matter, received from your office, have been promptly mailed to the several districts. I had considerable difficulty in procuring from the townships satisfactory information of the last year's enumeration of children. I was anxious that there should be no reasonable ground for complaint, relative to the division of the funds received from the State, and that my apportionment of the township money should correspond with the exact amount raised by the respective townships.

One of my most perplexing duties has been the settling of boundary lines. It is almost impossible to find any written evidence of the boundaries of any district, that had not been incorporated under the old law, hearsay and custom being the only guide in many cases. As all districts are incorporated under the new law and clothed with the power of raising money, it is all-important to know who are entitled to a voice in imposing a tax, and especially who are liable to pay the tax assessed. In some townships there is not the scratch of a pen of anything that has been done for fifteen years.

I hope to have this difficulty removed before the annual meeting in April next.

Many of the objections entertained against the law, if not removed, are silenced for the present. My intercourse with trustees and the

people has been pleasant and friendly. I have spared no pain to avoid all just cause of complaint against the manner of executing the law; though at the same time insisting that its provisions must be complied with.

Much of my time has been consumed in giving information relative to the requirements of the law, in deciding upon applications for change of boundaries, and other matters of an administrative nature.

The number of small districts that have been permitted to be created, is one of the most serious obstacles that the cause of common schools has to contend with. With one exception, which in the first month of my office I was induced to consent to, I have steadily set my face against the creation of any more school districts. In several instances I have consolidated adjoining districts, and for the future shall exert all my influence to diminish the number of districts, until each district shall contain a sufficient number of children to form a respectable sized school. I shall blot out the small districts as rapidly as circumstances will permit. The importance of adopting an uniform set of text books is universally recognized. The difficulty is to make the proper selection. The endless variety of editions is a serious objection to almost all the various compilations. The unnecessary number in each series is a great evil.

The short time I have exercised the office of County Superintendent does not call for or justify any extended criticism upon the present condition of education in my county. A few of our schools will compare favorably with those of any section.

On the last Friday in August, the first regular examination of teachers was held at Flemington. Messrs. Nelson V. Young, Rulif S. Swackhamer, and Miller R. Reading, teachers of the county, being my associates in the county board of examiners.

Nine Second grade, and twenty-five Third grade certificates of license were granted on this occasion. The County board of examiners met at Lambertville on the 7th of September, at Frenchtown, on the 13th, and at Clinton on the 14th of September.

Forty-three licenses were granted at these special examinations, making, with those granted at Flemington, seventy-seven in all.

I have granted several upon private examination.

The law has had one happy effect, in awakening public attention to the cause of education. In regard to changes in the law, I think prudence dictates that the experience of another year should be had before making any material alterations.

The annexed table, gives somewhat in detail, the disbursements of money for public schools.

The whole amount appropriated to the support of our district schools is \$26,901.64, of which \$21,500 was raised by township tax.

STATISTICAL SUMMARY.

MERCER COUNTY

WM. H. BRACE, SUPERINTENDENT.

It is impossible for me to send you a full statistical report at this time, as in a majority of the school districts, no records have been kept, and consequently the trustees could not furnish me with the information required.

During the months of June and July, I visited the school districts of this county, and appointed a district clerk in each one. In the month of August, a meeting of each Township Board of Trustees was held, and at the same time teachers were examined and licensed.

On my first tour through the county, I found the trustees of the schools very anxious to become acquainted with the provisions of the new school law. Rumor and hearsay had so magnified and altered the principal features of the law, as to make it highly objectionable to all concerned, but a little explanation, coupled with an examination of the statute itself, very speedily made it evident that there was not any foundation for those objections which were the most weighty and important. A liberal distribution of official copies of the law, very materially assisted me in my work, as in this way proof positive was furnished that rumor was wrong.

I will take the liberty of stating some of the objections :

First—That the teachers of the public schools would be required to pass an examination so difficult and rigid as to preclude the possibility of their procuring certificates, and as a consequence, our school-houses would be closed, and disorder and confusion prevail throughout the State.

Second—That all power and authority had been taken out of the hands of the trustees, and given to the county superintendents, who could shut up unsuitable school-houses, dismiss teachers, change textbooks, &c., &c., *ad libitum*.

Third—That the duties to be performed by district clerks would be too burdensome.

Fourth—That the abolishment of corporal punishment would so weaken the authority of the teachers as to create trouble and difficulty in the schools.

The first and second objections were obviously the result of "hear-

say evidence," as there was not a single basis in the law for one of them to rest upon. All of the trustees expressed themselves perfectly satisfied with the wording of the law, on those particular points. The third objection was not very strongly advocated, as it was readily admitted that there is a necessity for such work to be performed, as is required of the district clerks. Many of the school districts have kept no records of their proceedings, and consequently the past is, in their case, a perfect blank. I think that the fourth objection could be met by leaving it optional with the parents of each child to decide whether they would prefer that punishment should be inflicted by the teacher or not. If a parent should desire that his child be sent home for punishment, let the teacher be prompt in doing so, when necessary, and then let the trustees be sure *to sustain such action*.

Some of the remarks made by the trustees and patrons of the schools may not be out of place in my report. I will give three of the most general.

First—"The old law was a dead letter in our districts; its requirements had not been met, for the good reason that there was no responsibility resting upon any one."

Second—"Education must be kept separate from politics." This sentiment is universal.

Third—"If the new law is faithfully carried out it will be one of the most popular laws that we have ever had." This last remark referred more particularly to the great and efficient power which the law provides for elevating the standard of education throughout the State.

The punctual and satisfactory working of the law, at the present time, is sufficient proof that it does not produce either discord or confusion. It has already exerted a beneficial influence in many parts of our county. I think I can safely say that all of the trustees of our public schools, with but few exceptions, are strongly in favor of the present law. It cannot be denied that for a length of time there has been an earnest desire, in a very large majority of the school districts, for a system of education better than the old law afforded, and to the new one, divested of all those formidable proportions with which rumor had invested it has been hailed as the harbinger of a more improved state of things.

Many of the teachers have given satisfactory proof of their proficiency in the studies required by the third grade certificate, and have also produced good evidence of their efficiency as instructors and disciplinarians; but many others require just such incentive as the law provides to urge them forward in qualifying themselves for the responsible and highly important work of educating the young. The happiness, prosperity and usefulness of the future men and women of our country, in a great measure, depend upon the influences that are brought to bear upon them, and the habits they are acquiring, in our schools. *Indolent, careless, good-for-nothing teachers, will make indolent, careless, good-for-nothing pupils, while on the contrary thorough, active, live teachers, will make thorough, active, live pupils.*

Our public schools cannot be efficient until they are capable of

furnishing a thorough English education. The present necessity for sending children from home to finish their studies ought to be and must be overcome, for if it should continue, our public schools must undoubtedly dwindle into infant schools. Some parents who have the means, send to private schools, others similarly circumstance l object to this arrangement, as regards themselves, for good and sufficient reasons; the latter with a great and overwhelming majority of the people, must depend upon the public schools for the education of their children.

Our schools cannot meet the great wants of the age, nor be satisfactory to the people until there is an assurance, that the children of all, without regard to class or condition, shall receive a thorough English education.

The great benefits arising from our public school system are just beginning to be appreciated by the many; but as yet this system is only in its infancy and will remain so unless there is more effort put forth by the people, to secure for it growth, strength and efficiency.

I take the liberty of making this report the medium, through which to convey my sincere thanks to the late Town Superintendent, to the township collectors, and the trustees of the several school districts, for the very material assistance rendered me, in the discharge of my official duties.

MIDDLESEX COUNTY.

D. T. REILEY, SUPERINTENDENT.

I herewith submit my statistical Report. It is for this year necessarily fragmentary. Entering upon my duties in June, I have the labors of only a small part of the year on which to report. I have been met pleasantly everywhere, and have received an unexpected degree of co-operation. All seem to take for granted that more must be done for schools, and out of this spirit movements healthy and active are springing up everywhere.

It is curious to notice that many parts of the school law, which have been the same for years, now, for the first time, appear to become known. The measures of the law will hardly be more useful than the fact that somehow the people believe and expect that whatever the law is, it will be enforced, and the days of loose ends are past.

One of these clauses of the old law, which is so suddenly found to be law, is (law 79), that not more than twenty dollars shall be used for other purposes than teacher's salaries. There is a great difficulty here, more than this money is needed and must be provided for by special tax, and in a large number of districts this cannot be raised. The universal complaint is, that they cannot get a two-third vote of the district. Large numbers of Trustees from every part of the county have expressed the desire that there might be a change here. The danger that is to be feared from such a change, is that the poor would oppose the rich. But it will be difficult to find a district in which the people of wealth and position do not rule, and whenever there is a division, it is not the rich against the poor, but the wealth of the district divided against itself. The wealth and intelligence of a community will certainly control it. If, however, such a case should happen, that these classes of society should be pitted against each other, wealth could not poll the one-third necessary to save it from taxation.

There is one point in the law which occasions a good deal of difficulty. The article forbidding corporal punishment occasions more complaint from the patrons of the schools, than from the teachers. All agree that this is a point to be aimed at and one which can be

reached ; but it seems to many too difficult to be fully carried out at once. It might be well to give the trustees of any district the power, if they found it necessary under a particular teacher, or for a limited time, to permit the use of this mode of punishment.

I held the examination for teachers as required. There were comparatively few applications above the third grade, many of which, however, were so more from timidity than want of ability. The system of examination is already producing good results, and teachers are waking up to the necessity of study, if not for honor and usefulness at least for credit. I have been most ably assisted in these duties by George H. Linsley, of Metuchin, and S. M. Weatherwax, of Perth Amboy, of whose skill, experience, and ability, I cannot speak too highly.

There are movements in several parts of the county for graded schools. I hope that some of them will result in success.

One of the greatest difficulties of this office is the settlement of the boundaries of the districts. For many years the same questions have remained unsettled, and a constant source of irritation. There are a large number of districts where one or more families have been in dispute. In one case two hundred children have been counted twice, and so reported to the State Superintendent for many years. This part of my work, though most salutary and necessary, is exceedingly disagreeable, and I have sometimes thought that the decisions of all such questions would weaken the influence of the Superintendent in his own peculiar sphere, and yet there seems to be no other method of meeting the trouble.

No township in the county has as yet raised the maximum allowed by the law. Consequently a very small proportion of the schools are open all the year. The maximum of four dollars even will not accomplish this in a satisfactory way for the majority of the schools. I have endeavored, and shall continue to persuade the supporters of the school, that the only rational and economical education is that of the always open school, in the hands of a capable teacher.

MONMOUTH COUNTY.

SAMUEL LOCKWOOD, SUPERINTENDENT.

Accompanying is a full and minute tabular statement of the finances of each township, and of each district thereof, so far as the three public sources of income are concerned, viz.: the moneys drawn from the State, the county, and the township. As respects the two remaining sources of income, the money raised by tax on the district, and that raised by the impolitic mode of fixing a stipend on each scholar, in order to eke out the deficiencies of a parsimonious provision, the returns of the district clerks are so meagre as to be wholly unsatisfactory, and their tabulation altogether impracticable. Much to be regretted as is this scantiness in reports, it by no means implies remissness of duty on the part of the district clerks. These officers have shown a most gratifying intelligence, and zealous desire to report truly and well the affairs of their respective districts. But the truth must be told, even for their justification, that the two sources on which alone they could depend for the material necessary to make full and reliable returns, have been almost entirely wanting. For in the first place, as regards the finances, it is too true, that very generally, the records of the respective boards of trustees have been either carelessly or but partially kept; and what is almost incredible, in many cases, no records were kept at all; and in the second place, as respects the purely educational statistics, too often the teacher kept no register in his school; and when it was done, generally, he carried it off with him when he left. Thus after making a few praiseworthy exceptions, the reports on these topics are divisible into three classes:—those which give the very few facts obtainable—those wherein the district clerk has made a commendable effort to be full by giving the facts by approximation—and those wherein, seemingly out of sheer despair, these officers have ignored the whole matter, and confined their attention to giving the census of the district.

From the above it is evident that the county superintendent, in the delicate duty imposed upon him of appointing the first clerks who should serve during the fractional year, has not been otherwise than fortunate in the character of these gentlemen, who have served generally so faithfully and well. As respects the deficiencies of these reports, it is gratifying to believe, that with such faithfulness, they

cannot occur again, as the organization now accomplished must secure the proper registering of the material from which to report.

And while the above is true of the district clerks, it is also true, that in the year just closed, the superintendent himself found it not possible for him to accomplish all that his own wishes dictated, or even that the law enjoined upon him. The labor of organizing proved to be very great; so much so, as at one period almost amounting to discouragement, for while it was incumbent to make as early an appropriation as possible of the funds due the districts, the difficulty was very great to obtain accurately the old census of the districts; and but for generous aid rendered in certain quarters, the task must have proved impossible. According to the old law, every township census should be rendered to the clerk of the Board of Chosen Freeholders, after a simple form, wherein the census of each district, and part district, is given, and the sum of them all is given also as the census of the township. With very few exceptions, the returns to this gentleman were each given, simply as the census of the township, that of the districts respectively being ignored, of course, for the superintendent's use, these were of very little value. Hence arose the necessity of a very extensive correspondence, a labor which would have been spared, had this simple requirement of the old law been observed. It may give some idea of the amount of office work required, when it is stated that not less than five hundred letters were written and mailed, besides the distribution of three series of printed circulars. In consequence it has not been possible to do much as yet in the way of school visitation.

One series of meetings of the Township Boards of Trustees has been held in their respective townships. At these meetings free and full discussion was entertained, while many topics were introduced pertaining to difficulties of a local character; the greater part of these discussions were on difficulties connected with the new duties enjoined by the new law. It is confidently believed that these meetings were attended by the best results. Many school officers were thus brought together; a free interchange of opinion was held, and not a little prejudice was dissipated in the light of explanation, and calm consideration. The question of the duties of the new officers—the district clerks, was, of course, one of not small interest. And here it is right to mention, that the Superintendent was candid in telling these gentlemen that their office was of great importance, and would not be unattended with considerable personal care, in fact, that in a great measure, the prosperity of the respective schools would depend much upon the oversight and zeal of the respective clerks. Hence the Superintendent urged upon the different Boards of Trustees, a generous consideration of these facts; he even suggested as their duty that they should not permit this officer to consume his time, and expend his labor, and be utterly at his own charge. As a fair thing he took the ground that probably in all ordinary cases, the district clerk's duties would require at least three days attention in the course of a year; such labor, it was argued, was certainly worth \$3 per day. Then for stationery and postage, it was urged that not less than one dollar should be allowed. The result has been that throughout the

county, the boards by mutual consent regard their district clerks as salaried at ten dollars per year. Unless the experiment disprove it, I shall regard the measure as a wise provision, for this simple reason; it takes from the office of district clerk its otherwise entirely voluntary character, and makes it the more reasonable for the trustees to expect from this useful officer, the full measure of his important duties.

Besides these meetings of the trustees in township gatherings, some highly important labor has been done in visiting trustees for the purpose of adjusting district difficulties, or adjudicating the misunderstandings of the officers. Indeed the superintendent found here a field affording opportunities for the highest usefulness, and which oft-times exacted the very best exercise of his judgment.

It seems to me that as a full and clear exhibition of our educational finance cannot be less than interesting, and important, besides the three items now tabulated, two additional columns might be added, one for the amount raised by tax on the district and another for that unwise child-poll tax. Indeed might it not be that this last item annually exhibited would tend to shorten the days of a practice, which at best, is but an illiberal, or compulsory compromise between the two systems, the private or pay, and the public or free schools. Moreover, such an exhibit would be consonant with the genius of our free institutions, since the citizen has a right to be informed, and it is his duty to know those statistics wherein his interests as a parent and his rights as a tax-payer are concerned.

Assisted by a staff of gentlemen, alike qualified by an experience of many years in teaching, and by a happy urbanity of manners, three public examinations of teachers have been held. At the first one twenty applicants appeared, at the second twenty-seven, and at the third, fifty-three. Of these one hundred candidates, one was rejected because of defective scholarship, one for immorality, and one for other reasons. Two curious and interesting phenomena were noticeable as connected with these meetings. The first was held July 19; the next August 2d; and the third, August 30th, just the day before the expiration of that grace whereby the State Board of education extended the effect of the old and legally defunct licenses. The first fact observed, was that at the first examination, full thirty per cent. were candidates for the first grade license; at the second examination the proportion was about ten per cent.; and at the last one, it was about four per cent. Again, at the first meeting the teachers had their work done up some two hours earlier than had those at either of the subsequent ones; and it is further remarkable that the first grade license attained at the first examination, graded at least twelve per cent. higher than those obtained subsequently. Another fact of so small social significance, it was almost meant should be withheld; but common fairness demands its statement, however, and wherever it may reflect. The truth was indisputable, that in professional tact, ready and accurate knowledge, and neatness of the examination papers, the ladies very much surpassed the other sex.

Of the new mode of conducting the examinations, viz: by having the answers written, it should be said, that it was preferred to the

oral plan by the teachers generally, and by all those of the higher grades. Indeed, a fair comparison of this with the oral method (and of that my own experience as examiner, has been *ad nauseam*), must result in a clear verdict as to its superiority. It has several excellences. Its very reticence is humane and generous. Conscious that no one can cast an unfriendly eye upon her work, the timid candidate goes on with confidence, and actually does far better than her fears.

It has appeared to me that the oral method pursued with the same questions as used in the written course, would be fatal. It levels the differences of mental stamina, and ignores the idiosyncracies of mental habit. The written mode deals emphatically in fair play to the timid and the bold. The sanguine, the mercurial and the phlegmatic, have equal chances in this trying ordeal. As nearly as any system can be, this is faultless, and pre-eminently fair; for under it the slow but true thinker, if he have the knowledge, shall appear at last with equal advantage to his sanguine compeer, whose task was done an hour before him. Moreover, the system of grades, is a piece of justice unknown to the old regime, under which one form of license served every case; and so far as the face of the credential went, there was no difference between the most accomplished and the most illiterate.

But while on this subject of graded licenses, it is well to mention an anomaly which at present stands connected therewith. There is certainly nothing in the law to forbid that the holder of a third grade license should occupy the highest positions in our schools. Nay, the fact is not wanting of a principal holding a third grade in common with his assistants; and also of an assistant holding a higher grade than the principal. But it must be with these anomalies, I suppose, as with certain bodily ailments, which medicine cannot reach, but which may become outgrown by a healthy physical culture. So we do not think legislation can cure this abnormal condition. Give us a vigorous school culture, and the progressive outside thought will at length set this matter right. When on this subject, indifference shall be dissipated, and true thoughtfulness shall prevail, then will be seen invariably at the teacher's desk, the rightful parallel of merit and position.

This Report must be considered as seriously deficient, should it purposely leave untouched a certain vital fact. On this point, deference to what may be regarded as "*the modern spirit*," might suggest silence. But it surely is unheroic to be silent where a deep conviction of a great truth is concerned. Still reticence is very tempting when we fall upon that which a high authority calls "the barbaric dispensation," "the penal code," "and self defeating." And yet, however well meant the enactment, I am constrained to think, from all I have heard and seen, that the clause in the law on "corporal punishment," has greatly increased the difficulty of that always very difficult thing, discipline in our public schools. To a wilful boy who has sunk below the sense of honor, or who has ceased to feel the tingling of shame for a dishonorable act, expulsion from school is no punishment, but actually is in some cases a *desideratum* to the culprit. But, this ex-

pulsion to be anything, must be for a time sufficiently long to be serious; and then it is, that the moral wrong comes in, for therein it becomes a serious fraud upon the State. Such a boy by expulsion from school, may really be set adrift with his face prison-ward. He is driven out of the salvatory atmosphere of the school-room, with its wholesome discipline, its moral restraint, and its mental culture, into the Upas clime of youthful license, and irresponsible non-restraint. Denied the rod the teacher is compelled to shut him out from the healthful and hopeful influence of a firm government. Then, on the score of degradation, the rod is respectable compared to the Cain-like brand of "*turned out*," put upon a boy. Like that pitiable ancient, he is sent into "the land of vagabonds." I regret to say that very worthy teachers, driven to a strait, have ignored the law of positive acts, and others by subterfuge, such as getting permission from the parent to punish the child. If a suggestion be warrantable, could not some discretionary power, be vested in the Trustees? so that in extreme cases the teacher might lay the matter before them, and they could grant or withhold, as their judgment should see right.

Already the working of the law has been to a degree salutary. From the teachers, trustees, and people, thought has been elicited, and its resultant has been action. The forces are set in motion, the instructor has become more studious, the school officer more zealous, and the people more liberal. Besides the law has unearthed some strange things: not intentional wrongs, but for all that, real and serious evils. To mention one class only, that of districts with large sums of money accumulated! How? By employing teachers too *few*, and too *cheap*. Spurious economy! "Saving at the spigot and spilling at the bung hole." Giving the children chaff, when there was money plenty to buy them wheaten bread! Lamentable wrong! Who can replace for these children those lost opportunities? A tender, impressible age gone, and gone forever! It is reassuring to believe that under the present law these things cannot re-occur.

Not inappreciative of his position, although sometimes oppressed with a sense of its responsibility, the superintendent of Monmouth has endeavored, to the best of his ability, and with a true love for his labor, to make the new law efficient for good in the sphere of his appointment. He regards it as a happy fact, that in the trustees of the schools, he has found so much practical good sense, and honest zeal. He has met no serious opposition to the law. And where prejudice has been met, it is pleasant to record that looking below the surface, he has found a commendable apology.

Our county has glorious memories. Here the descendents of the Jersey Blues are many, and they cannot forget those days of trial, and those acts of suffering borne against unjust encroachments, and which culminated in the battle of Monmouth. Hence, by heritage we are a people jealous of innovations. But give us time, let us test the law, and we will conserve its merits; and as the wont of wise men is, we will "prove all things, and hold fast that which is good."

TABULAR STATEMENT.

MORRIS COUNTY.

R. H. DEHART, SUPERINTENDENT.

The following is a summary of the statistics for this county :

No. of Townships,	12
“ “ Districts,	153
Whole amount received from State,	\$5,419 18
“ “ “ “ Surplus Revenue,	3,981 64
“ “ “ “ Township Tax,	28,584 50
“ “ “ “ District Tax,	2,300 00
Whole amount expended in the county,	\$40,285 32
No. of children between the ages of five and eighteen years,	12,019
Whole number of these who have attended school for any length of time,	8,047
Number of male teachers employed,	70
Number of female teachers employed,	100

Of the teachers above numbered, thirty-five males and sixty-one females have been licensed in the several grades under the new law. By far the largest number of these have applied only for the third or lowest grade certificate; and, in this grade, with a few marked exceptions, we have found the questions issued by the State Department sufficiently difficult. Indeed, had they been much more so, we should have been compelled to refuse licenses to so great a number, that one-third of our schools would have been without teachers. The failures, especially on the part of the female applicants, was unquestionably due to nervous excitement, a difficulty which will wear off as the new system becomes more familiar to them. Many have declared their intentions to apply for a second or third grade certificate at the next examination, and are making strenuous efforts to get into the nineties, as they call it; and while upon this head, I cannot help remarking that the issuing of three grades of certificates by the State Department has furnished a motive for self culture among teachers which must result in great good to the schools of the

county. In behalf of the teachers of Morris, I would urge the State Department to put a little more back-bone into the next issue of questions. And further, in respect to teacher's deficiencies, it is due alike to the profession and to the employers to state frankly that by far the greatest falling off was in the faculty of black-board demonstration, or, in plain terms, in the faculty of drawing well. This, it seems to me, is a branch that cannot be too strongly insisted upon. Aside from the advantage which the possession of this accomplishment gives to the teacher, in enabling him to present *objectively* before his pupils anything he may wish to impress upon their minds, it is an acquirement so necessary to almost every pursuit, that it should hold a far higher position in the course of common school studies than it ever has held.

Since my appointment, I have visited once, by far the greater part of the schools under my charge, and in these visits, although I have found many admitted deficiencies in methods of teaching and government, I have found much more to commend in almost every teacher engaged in the county. Patient toil, under the greatest possible disadvantages, is a leading trait with almost all of them. Taking into consideration the ill conditioned premises upon which most of them toil, their perseverance may almost be dignified by the title of heroism. Blackboardless walls, paneless windows, smoky chimneys, creaky floors are characteristics of by far the greatest number of our school edifices, yet under circumstances that would set most of our housewives, with the care of two or three children, to very inexcusable expressions of ill temper, our little school mistresses walk quite composedly, and with a self-command that would do honor to a commander-in-chief. Defects in our school houses and furniture are the greatest disadvantages under which our teachers now labor. Bounty taxation so excessive, that in some localities it almost amounts to confiscation, will no doubt greatly retard the building of better school houses. Still, in many parts of the county, the people are putting forth commendable efforts towards improvement. Prominent among these localities are Columbia, in Chatham township, whose snug, Gothic school house of "mellow brick" forms a striking figure in the beautiful landscape. Morris Plains, where the people have been taxing themselves to erect a commodious public school building; and Morristown, where they propose to erect a superb building, at the cost of \$45,000. Prominent among the movers of this good work is the Hon. George T. Cobb, whose munificent donation of \$10,000 will greatly lessen the burdens of the tax-payers. Could he find a better altar whereon to lay his offering, save one?

Of course, in this as in every other county, there are Normal teachers and teachers that are not Normal, and I have been so frequently asked which are the best, that I will make a brief statement of my opinion, based upon observation. Normal instruction will not make a first class teacher where natural ability is wanting, but take two teachers of equal natural capacity for teaching, one a Normal and one not a Normal, and the Normal has the best of it. This of course is spoken of young teachers. Teachers of long experience, and patient observ-

ation, will inevitably acquire all that can be learned in a Normal school. Some such are now laboring in the schools of the county, whose tact and ability are second to none; yet I should be false to my convictions did I not urge upon every one contemplating a teachers life, to spend as much time as possible in some well organized training school.

OCEAN COUNTY.

W. F. BROWN, SUPERINTENDENT.

The law and instructions requiring a report is hereby complied with, though we have but little to communicate of a cheering character. The cause of education is at a low ebb generally in this county. Several causes combine to produce, or rather to continue this unfortunate condition of things. First, a sparse population. Perhaps no other county in the state has even the proportional difficulty in this respect. Counties more densely populated cannot have this obstacle to contend with. Here there are many localities where children may be gathered together, but not in sufficient numbers to sustain a school. Parents unable to send their children from home, they are growing up with exceedingly limited means of information. Second, it is painful to believe that there are too many instances where parents, abundantly able, neglect the welfare of their children in the matter of education. We are compelled to believe that the admonition "if any provide not for his own, and especially for those of his own house, he hath denied the faith and is worse than an infidel," may be applied to this class. Many parents ordinarily humane and kind, who make ample provision for the physical wants of their children, seem to place a very low estimate on the wants of the mind. Their children must be supplied with wholesome food, good clothing, and other estimated needful *requisites* for their bodily comfort and convenience, but to provide the required mental aliment is not regarded as essential. If a correct *physical education* tends to "give strength, health and vigor to the bodily organs and powers," so the proper education of the mind must be productive of equivalent results to the higher nature, and more important part of man—the intellect. If this is so, and if education is preferable to gold—if education is necessary in order to qualify for citizenship and the duties of life, parents who have the pecuniary means, and neglect their children in this important duty, certainly must see that the above admonition will measurably apply to them. Third, often a *seeming* want of understanding on the part of the friends of education, as to what will best promote their interests, impedes the work. Districts where no more than a reasonably good school can be maintained, are

divided, to afford, it is thought, better accommodations to all concerned. Soon after, the mistake is discovered, as neither district is found capable, separately, of keeping a school in operation. Fourth, a want of concert. Our independence often prevents our children from receiving the education they might. Two districts might unite a part of the year, and thereby secure what they cannot separately; but their purpose to maintain independence, and get along without the aid of each other, must be permitted to keep the children out of what is due to them, and would accrue greatly to their enjoyments and advantage. It seems useless to enumerate and multiply these obstacles here. You know them and their results. Fifth, want of funds and the plan to obtain them. Growing out of the first named obstacle, many of our school districts will remain long without educational facilities, if obliged to depend on the resources to be raised in their respective districts. While many of the taxable inhabitants object to raising large amounts of money by township tax, little or no objection would be offered to a State taxation for the purpose of establishing a good system of free schools, thereby affording to all the benefit of education. May we not look forward with anticipation and hope of the near approach of that happy era?

COUNTY, TOWNSHIPS, &C.

At this date we have but few schools in operation. During the summer season there are but few localities in this county where any considerable degree of interest is manifested in relation to schools. In addition to the ordinary agricultural pursuits, the spontaneous production of small fruits in this region, invite all who have not more important or lucrative employment to avail themselves of the natural revenue and advantages to be derived therefrom. The present season the superabundant yield of these fruits will more materially affect the commencement of schools. It is believed that the county of Ocean this year will furnish the markets with 50,000 bushels of cranberries alone; the result will probably show a much larger quantity. The presentation of this fact here may be regarded as not pertinent to the subject; but it will show that the gathering of so large a crop, requiring weeks of labor, must tax that portion of the population chiefly who make up our common schools. The eastern angle of the county is over 40 miles long, the south-west angle 35 miles, and the north angle about 30 miles. We have seven townships, with fifty-two school districts scattered over this extensive territory.

The more liberal policy of the legislature in authorizing the Raritan and Delaware Bay Railroad, and more recently, the extension of the Camden and Hightstown (via New Egypt) Railroad is attended with marked and highly gratifying results. Our hitherto uncultivated lands, and numerous dormant water powers are being brought into requisition, the resources of our county are beginning to be developed, and a new impulse imparted to our interests generally. The increase in population of families of wealth and intelligence, a result chiefly, of these new public improvements, and more especially connected

with our subject, cannot but be greatly promotive of our educational interests, or too highly appreciated. We hail with joy, the not very distant prospect before us, when "*The wilderness and the solitary place shall be glad for them, and the desert shall rejoice and blossom as the rose.*"

BRICK TOWNSHIP.

This township has ten districts (two of which are parts of districts). In district No. 1 (Point Pleasant) a new school house is being completed at a cost of about \$1,500; so far as it has progressed, it has been done by voluntary subscription. Two or three other districts greatly need new houses. The census of 1866 reported 689 children; by late census 731 are reported. The township will raise by tax the present year \$2.00 for each child, on the basis of last year's census, amounting to \$1,378.00.

DOVER TOWNSHIP.

Has eleven districts. The county seat (Toms River), is located in this township. District No. 4 (now 3), numbered in 1866, 245 children—in 1867 301. The district has a substantial two story school building, and a laudable degree of interest is evinced by the people. They voted at a meeting held recently, to raise \$325.00 for books, &c., for the use of the school. In 1866 the township had 834 children; by the late census there are 891 children between five and eighteen years. They raise by tax the present year for schools \$3 per capita or \$2,502.00.

JACKSON TOWNSHIP.

Has eleven districts (Nos. 1 and 9 being parts). By the census of 1866 they had 730 children, while by late census returns they report only 645. They raise for schools the present year \$800.00. Two of the districts No. 4, (Holman's), and No. 11 (Cranberry), have resolved to erect new school houses, which will no doubt be accomplished soon. We look for much improvement from the enterprising population of this township.

PLUMSTED TOWNSHIP.

Is located along the line of the Camden and Hightstown Railroad, the road running through New Egypt, the principal village of the township. At this village is located the Seminary of Hon. Geo. D. Horner, present Senator from the county. This institution is in a flourishing condition and enjoys the patronage of all, irrespective of sect or party. The township has seven districts (Nos. 3 and 7 being parts, and united with Nos. 1 and 9, in Jackson), and in 1866 reported 657 children; by new census 699. Township school tax 1867—\$600.00

MANCHESTER TOWNSHIP.

This is a new township, situated along the Raritan and Delaware Bay Railroad, Manchester village being half way between New York and Philadelphia. By census of 1866, they had 256 children, and tax for schools this year \$1,024.00, or \$4 for capita, being the full extent authorized by law. The census of August reports 297 children. A lively interest is felt here in the good and common cause, as evinced in part by the amount of school tax. No small impetus is given to the cause here by the comparatively large influx to this place of persons from the East and elsewhere. The inducement of abundance of cheap lands, together with the facilities of reaching in an hour or two, either of the two largest cities and best markets in the United States, must continue to hold out attractions to those desiring cheap homes in a salubrious climate. We look, therefore for no abatement, but rather an increase of interest in this vicinity.

STAFFORD TOWNSHIP.

This is the most southern township, and joins Burlington county. It has four districts (No. 4, a part). In 1866 they numbered 504 children, as per report of county Freeholders. By census of 1867—491 are reported. They raise the present year \$300.00 for schools. The principal villages are West Creek and Mannahawkin. There is a desire for good teachers and good schools, and many are willing to pay for these privileges.

UNION TOWNSHIP.

This township, next north of Stafford, has six districts (Nos. 5 and 6 parts) and reports 626 children for 1866, and 610 for 1867. Their school tax is \$600.00. The school building at Barnegat, erected by the voluntary contribution of a few gentlemen, is worthy of notice. Its modern style of architecture, its well arranged and handsome seats and desks, its walls covered with maps and charts, with its well selected Chemical and Philosophical apparatus, constitute this school, under the able supervision of Prof. E. A. Hyde, one of the best, if not the best, in this eastern section of the State.

THE SCHOOL LAW.

The new school law, having passed the Legislature after the town meetings were held, it will be seen that some of the townships do not raise a sufficient amount by tax to answer the requirements of the law. The Town Committees have not, in all cases, felt warranted in adding the required sum, believing at the same time, from the above fact, that they could not, the present year, be held strictly to the letter of the law. Two or three of the townships, through their committees, have directed the required amounts to be taxed.

The law is approved by some, and objected to by others. Certain

it must be that, if the system of examinations adopted is continued and strictly adhered to, it must give to the schools competent teachers. If the rule requiring uniformity of text-books is established and fully carried out (and no intelligent or reasonable person can object), it will save parents the expense incurred by the constant changes they have hitherto been subjected to; it will place in the hands of *competent* teachers the *best books*; this being done, it will place in possession of the children the best facilities for acquiring knowledge. When the advantages of these beneficent measures are understood, they will be appreciated. At present it is mortifying to believe, to a considerable extent, they are not. Until they are, you, sir, and the friends of common schools generally, may expect their motives suspected by jealousy, their characters maligned by envy, and the good work impeded, and, if possible, defeated by the combination. We do not apprehend that perfection is claimed for the new law. It is, without doubt, susceptible of improvement, yet it cannot be denied that in many particulars it is an improvement on the past.

EXAMINATION BOARD AND TEACHERS.

The Board of Examiners is composed of William B. Hill, Esq., of Brick, and E. A. Hyde, Esq., of Union, the old and tried county examiners. The regular quarterly meeting was held in August, but the number applying for certificates was so limited that it was deemed advisable, and even necessary, to hold another meeting. Accordingly, the meeting was adjourned for two weeks, at which time (September 13 and 14) several others requested license. About twenty at this date, only, have been examined. Not one-half the districts are yet supplied with teachers.

DISTRICTS AND SCHOOLS.

But little more at this time can be added. The basis of a report, generally, must be the returns from the districts. These have been, and are so limited, that the consequence must be a meagre report. Notwithstanding the fact that every school district was visited or written to, and district clerks appointed, the County Superintendent has as yet received very few reports of the action of districts. Several from which reports have been received, communicate the information that "no trustees have been elected and no new district clerks appointed."

CONCLUSION.

It would be useless to attempt to give you scarcely an approximate idea of the work to be done. The county has not been redistricted. Many districts know their boundary lines, but with others, there are no well defined lines. So much uncertainty exists in relation to them that this work will require much time and labor in this county. The instructions impose the obligation, that "each district must be visited

by the Superintendent twice during the year, and oftener, if practicable." Several of the districts in the county are about forty miles from my residence. The districts of Stafford will average about 40 miles; Union 31, Plumsted 27, Jackson 18, Manchester 18, Dover 17, and Brick, 5. Say that the districts of Brick will each require one day only. Should each of the districts elsewhere be visited, and intervening time for travelling to and from each district in the county, in the ratio of the above statement, be allowed, it would require one hundred and thirty-six days, that is to say—allow one day each for the school visits, and the balance, or one day each for going to and returning from said visits, and it would occupy that number of days. If this arrangement is carried out, an average of twenty miles a day, must be travelled for the ninety four days, by private conveyance, as there are only six districts along the lines of railroads. This would give in the aggregate over two thousand miles to be travelled, in thus making the one tour. In complying with the instructions strictly, the "districts must be visited *at least twice*," which in the same ratio, would require two hundred and seventy-two days, and an amount of travel equal to four thousand miles. Supposing continued good weather and favorable circumstances, and an average of four visits are made, with time allowed for going and returning *once a week only*, and it would then occupy thirteen weeks to get through the district visits once; and require to be travelled about six hundred miles. Double this to answer the law, and it would amount to twenty-six weeks or six months time, and about twelve hundred miles road travelling to be performed. This reduces this branch of labor to the least time, and least amount of road travelling requisite; and at the same time requiring necessary absence from home for about one half the year (not including Sabbaths) provided all the districts are in operation and visited. It will be remembered that this will constitute or embrace only a part of the duties. By the above statement, it will be seen that the Superintendent must be subjected to the inconvenience and expense (no small item) of spending a large portion of his time away from home for days and nights together; and that too, in this county, during the most inclement season, or let the duties imposed remain unattended to. In conclusion, we may be permitted to say that it is believed that, in some of the counties receiving the least remuneration, the most labor is required, and the heaviest expense incurred. This will, doubtless, be corrected in due time. Receiving no reports from schools, of course none can be presented here. The financial and census reports herewith forwarded, will be found as full and complete as the materials furnished will enable the Superintendent to make them.

PASSAIC COUNTY.

J. C. CRUIKSHANK, SUPERINTENDENT.

The sculptor forms his statuary from the rough stones of the quarry, and the mechanic his edifice from the rude shapen tree of the forest, material substances, over which he works and from which he brings his structure to completion. In following the returns of the district clerks, I have not even shadows to take an impression from, over many reasonable questions seeking for an answer. The district clerks are not to be blamed for any neglect or indifference, because their work was not remunerative, but to be commended for their willingness and cheerfulness to do their best. The difficulties in their way, were the absence of permanent documents to instruct. Records of facts were wanting, and work required to compare the past and the present, drew from the district clerks the despairing words "what shall I do?" and gathering an emotion of courage, "well I shall not work in the dark hereafter, and will do the best I can."

Financial returns do not represent anything near the amount expended in the county, either for educational purposes or the incidental expenses attending. Debts have been made, money has been paid, district trustees have made their annual reports; received and adopted, have been the action of the meetings; but no records made, no documents to be transmitted to successors in office. Thus, rather than give approximating figures, the district clerks have given their returns in blanks.

Census returns have been taken with accuracy and diligence, by personal visitations and inquiry of parents and guardians as the law requires.

Number of children who have attended school "between nine and twelve months, between six and nine months, between three and six months, and less than three months," has been a trying and most perplexing question. To confine my reflections to the returns, I would have no more to say; I have, however, observations beyond them. Select and family schools have been opened to a considerable extent the past season. In passing into the new system of instruction, uncertainty led many to adopt this mode, who will, when they understand the value of the changes made, become the patrons of the public

schools again. In many places the public schools were closed; township collectors take no interest to keep them open; the school funds not available for a time. This appeared the only way by which the children could be kept in the process of education. But of the number of children who have not attended any school in the county or city of Paterson, choosing an approximating estimate, I would say two thousand. What an empire of darkness, ignorance and vice is here! Are these children in twenty years to give tone and character to our county and city?

Free schools, entirely so, are not known in the county. Trustees adopt the plan of economizing the public funds, and charge all alike a quarterly tuition fee. The people are accustomed to it and pay it because they are "getting *something* out of *somebody*." Education is defective, school rooms are inconvenient, the want of funds is embarrassing, but by *it*, in *them* and through *them*, the nation has been educated. Farmers, mechanics, merchants, legislators, and even honored mothers, have hewn their way to eminence and respectability, learning and fame. Thus with all their defects they have sustained the struggle for freedom. If they could be made perfect, how safe would our institutions of liberty ever be?

Questions of refereance are rapidly increasing. Some are only personal disputes, and others on subjects in which there are causes of just complaint. Men of improvement think of the school house and its appendages, in the introduction of the new law, for a time, I have recommended moderation and forbearance. I wish to make the changes in the State laws, as far as I am able, acceptable. The good school house is a monument of virtue and intelligence, and if wanting, the people perish for lack of knowledge.

School teachers educate kings and train sovereigns. Of the male teachers in the country, a number have been engaged in the educating work for years; have by their industry and perseverance studied into the art, and now make it their daily business. They are worthy of encouragement. Let them be congratulated for their success. Apt to teach, of good habit and principles, they are an honor to their calling, dignify their occupation, and command the respect of their pupils.

Of the female teachers, I have for six years marked, attentively, their mode of instruction, school government and success. Their adaption and qualifications, to be principals and not subordinates in the public schools, are proven by experience and history. How they toil, at small compensation. Why is it so? Is it because they are more amiable, conciliatory, exercise the more patience and forbearance? Is not the day at hand when their services will be duly considered and justly compensated? I have had to assume courage to resist persuasion and determination, to prevent some from entering the school room, to keep it, but not to teach the children because they were willing to teach cheap. This is a good qualification with some employers. How can ignorance guide, or darkness impart light? Educators must be educated.

The magistrate and legislator are honored by men, but a greater responsibility rests upon the school master and mistress who teach the

young. The former may make the laws, but the latter educate the children of the State. The former may regulate banks, manufactories and railroads, but the other give character and thought. I often am constrained to say, in my visits to the schools, "that child can bear poverty, but it cannot ignorance and vice." Therefore be faithful and bear in mind, your character is stamped upon your pupils. You mould their thoughts into shape. Your pupils will imitate your walk, looks, words, and enter into your feelings, and adopt your opinions. It is the school teachers, that will give character and education to the children of the State. Vice pays more than virtue. The rum-seller has his gilded room, easy chairs, warm stoves, and his waiter, at a salary of eight or ten hundred a year, but how few are the conveniences and comforts of the school room, and the teacher poorly paid.

Trenton and its vicinity are highly favored, they have a Normal, the Model and the Farnum schools, institutions of worth. Many aspiring youths in our county hear of them, think of them, and desire to be benefitted by them, but distance, expense, and the want of means are in the way. We have in our county gentlemen of wealth, whose best capital has been their education (who will, I hope, found a county seminary, whose doors shall be open to every youth in the county, that has attained to a certain standard of education in the public schools). Let it be engraven on the monument, erected over their graves, that they turned gold into knowledge, wisdom and virtue. Such an institution, I claim from them for the county of Passaic, which shall be a fountain to send out streams of living truth, to dignify the present and the future, and to answer the requirements of public education.

Paterson City reports 7093 children, making the total number of children in the county 10,743.

SALEM COUNTY.

WM. H. REED, SUPERINTENDENT.

The following is submitted as a report concerning the organization of the Public Schools of Salem county under the New Jersey School Law; also of moneys ordered and appropriated by the townships, county and State, for the year passed; and of the number of children between five and eighteen years of age, in the several districts of the county.

The appointment of County Superintendents, April 25, 1867, was preceded by instructions issued to school officers under the new school law, and among these it was made the duty of County Superintendents to proceed at once to meet the trustees and teachers at convenient places within their several townships, to appoint district clerks, and trustees to fill vacancies, and without examination to issue to teachers temporary licenses to remain in force until the first of September.

These directions were carried out by personal communication with each board, mainly through their representatives. By the performance of the above duties the school law was put into operation, the business of the boards of trustees proceeded regularly, and the teachers received their pay.

In the meantime the Public School moneys appropriated by the State were apportioned to the several townships of the county, and then to the districts of each township; the interest of the surplus revenue, which had been previously apportioned to the townships, was sub-apportioned to the several school districts. Copies of apportionment papers were drawn for the convenience of the district clerks. The second instalment of the surplus revenue interest will be apportioned in November, when the moneys ordered at the last town meetings will also be apportioned to the districts.

A stated examination of teachers was held on the last Friday and Saturday of August. Two gentlemen of the profession, of the county, were selected as assistant examiners. At this examination forty-two applicants were examined.

It is due to those with whom I have come in contact in the discharge of my official duties, to say of them, that they have manifested

a desire to do all in their power to aid in carrying out the provisions of the law under which we are working.

That there is an increasing interest in reference to the Public Schools of the county there is no doubt; and that this will soon manifest itself in a larger number of good school buildings and suitable furniture, in the business management of schools, and in an increased number of skilled and efficient teachers, is equally evident. That they may become the means of imparting to the youth of the community true and correct principles in all that pertains to the foundation of an education, and that they may prove to be nurseries of virtue is a sentiment generally entertained.

In reference to the disposition of citizens to provide the means for conducting the schools properly, it is proper to state that in one school district, in a rural portion of the county, the sum of five hundred dollars has been ordered under the provisions of the law to pay a debt incurred in building a new school house. In another district, a sum of money is raised by district tax, to render the schools free. By direction of the last will and testament of one whose desire was to promote the interests of education, one of the townships of Salem county, Lower Penn's Neck, receives the yearly profits of a farm of considerable value, for the support of public schools. This source of means, taken in connection with the public provision contemplated in the law, will enable the citizens of this township to establish excellent schools.

					5,778

This is the total number of children in the County, exclusive of Salem city, viz., 5,778.

The number of children reported by the City Superintendent of Salem City, is 1,213. Total of the county 6,991.

The reports of the district clerks are not so complete as was desired, owing, no doubt, to the want of school registers, and the want of care in the management of school business. It is remarked, however, by several of these officers, that they apprehend but little difficulty in the future.

SOMERSET COUNTY.

FRED. J. FRELINGHUYSEN, SUPERINTENDENT.

The cause of education in our county is on the advance. We have better teachers, greater facilities for imparting instruction, and *larger appropriations* for the support of schools. The operations under the present law, although not as yet perfectly understood by the people generally, have been beneficial, and as far as my knowledge extends the law is admitted to be the best we have ever had. The reports of the district clerks of this year, extending as they do back to the condition of the schools under the old law, furnish the best commentary on its defects, as the reports from the same source next year will exhibit some of the benefits of the present law.

In reviewing the census of the children by the districts clerks I find that the work is done with greater accuracy since these reports have been required to be made under oath or affirmation.

In the discharge of my duties as Superintendent, at an early day after my appointment I met the trustees of schools in their respective townships and gave all the information required of me in explanation of the school law, and at the same time appointed district clerks and supplied vacancies in the Boards of Trustees by making appointments for that purpose.

I appointed a Board of Examiners for examining and licensing teachers. This board has met quarterly at a time fixed by the State Board of Education, and have examined and granted certificates of license to sixty-eight teachers—four of whom obtained a certificate of the first grade, eight of the second grade, and fifty-six of the third grade.

The examination has generally been well sustained, and in my visitation of the schools under the charge of these teachers I have found them zealous and faithful. The new law in providing for licensure by grade, or rather the rules of the State Board by authority of the law having directed this mode of licensure has excited in many of our teachers a desire to obtain a higher grade of scholarship, and by virtue of the incentive thus offered of a public recognition of their attainments are preparing themselves for examination for the highest grade. The effect of this will soon be apparent in our Public Schools. Our

teachers are encouraged to qualify themselves to instruct in the higher branches of learning; and when thus qualified our children will reap the benefits, and the man of limited means who could not afford to send his children from home to complete their education will have this inestimable boon conferred upon them at his own door. I firmly believe the past history of this county and of our State would establish the fact that many a gifted intellect has been dwarfed because the facilities for obtaining instruction in the higher branches of knowledge which are now to constitute part of the common school education have not been within the reach of parents.

In my visitation of the schools I have found the common evil existing here of having in use an endless variety of text-books. To remedy this a meeting of the trustees and teachers of the county was held, pursuant to a call I made upon them, and selected and recommended a uniform set of text-books to be used in the schools of our county; and by the liberal deductions made by the publishers for these books, our schools are being supplied on very favorable terms.

Our teachers have introduced map drawing in some of our schools according to the new and improved system. I would be glad to see Apgar's Map-Drawing Book and Geographical Charts in every school in our county. I believe map drawing to be the most impressive method of teaching geography, and have witnessed its benefits in several schools. I have found that many of our schools have not the apparatus they need for imparting instruction; and to raise money to procure this, the law authorises an assessment to be made, provided, two-thirds at a district meeting called for the purpose so determine. The process of collecting the money, and of determining that it shall be collected, is too slow. In some instances the people have to be convinced of the necessity and importance of these modern improvements before they will vote for them. It would be well if the law could be amended so as to authorize the trustees of every district to use of the *School Appropriations* a sufficient amount so as to furnish every school building with globes, maps, blackboards, and other apparatus, without compelling them to await the tedious process of the law, and the uncertainty of a district vote.

It is to be regretted that out of the number of children reported who should be in our schools, the average attendance is so small. In one district in this county the District Clerk reports 244 pupils, and the average attendance is about 125. There are various causes to be assigned for this neglect on the part of parents to educate their children. I do not know of any remedy for this great and growing evil, unless it be by appealing to the reason of parents, and by argument and entreaty, convincing them that the interest of society, as well as their own individual interests would be greatly promoted by their attending to the education of their children, and that they should recognize it as a duty paramount to every other.

The present law has exerted a good influence in compelling districts to provide proper buildings for educational purposes. In our county some new buildings have been erected, and many have been repaired and made tenantable. In a new school district in Branchburgh town-

ship a school building has been erected by private enterprise, at a cost of over \$2,000. In the town of Pluckamin the people have remodelled and repaired their school house, at a cost of over \$1,000. I might mention other instances, showing a very great change in popular sentiment in regard to school buildings, and a very commendable liberality to meet the inquirements of the present law.

During my term of office I have made several changes in school districts. I have been slow to make changes except in cases where great injustice was being done to the applicants who petitioned for their rights. I will send you a duplicate of the boundaries of districts as soon as practicable.

One word as to the clause in the law abolishing corporal punishment. Although this clause may have provoked discussion and some opposition in other parts of the State, I do not know of any serious objection to it in this county. I hope the law as it is will be tried another year, or if changed in this particular clause, that it may be so modified as to leave the matter discretionary with the teacher and trustees of each district. In my judgment the right to inflict corporal punishment belongs to the parent alone. It is a right conferred by God in the teachings of his Holy word to the parent. It cannot be delegated to another. I admire the wisdom of the legislative enactment that protected it. I believe the authority to administer corporal punishment in our schools heretofore has created more disturbance, and been the cause of the dismissal of more teachers and caused the withdrawal of a greater number of scholars from school than the present law can ever occasion. I believe you can govern a school much better by appealing to the better nature of its pupils than by provoking the bad. When there are so many instances on record in which the vilest outcasts and the most lawless could not be restrained or disciplined by the infliction of punishment by the law in its severest penalties, and yet have been transformed from very demons, to children of hope and promise by the law of sympathy and kindness, may we not hope that the all-pervading influence of the latter may triumph and be universally acknowledged as the best method that can be adopted in the government of our schools.

SUSSEX COUNTY.

N. PETTIT, SUPERINTENDENT.

The annual report of a County Superintendent, I presume, should give an accurate delineation, both statistical and general, of the condition of the public schools in the county. In the present instance, however, as the superintendence has only been for a period of five months, during which time effort has been mainly directed to the inauguration of the new school law, such accuracy of report cannot be expected. On entering upon my duties, I immediately called together the Township Board of Trustees. In response to the call, I was gratified to find a very general attendance. In eleven townships out of fifteen, every school district was represented. Where vacancies were found they were filled, and district clerks appointed, who uniformly accepted the office, and performed its duties. At these meetings where so many of the influential men of each township were assembled, I took occasion to read the school law and give such explanation as seemed to be required. A copy of the law was left with each clerk. There is evidently a determination, on the part of our people, to secure the beneficent advantages for which the law provides.

This arises from the fact that this is the first year in which there has been an accurate enumeration. Under the old law, no one was individually responsible, and the desire to get as much public money as possible in the district, led to exaggerations. The result was, the State and townships were paying for the education of a much larger number of children than were actually within the legal ages. The present law, by requiring the district clerk to number them and report, under oath, has obviated that difficulty. The accompanying report, by townships, is believed to be entirely accurate.

PUBLIC MONEY.

The income from the surplus revenue, in Sussex county, has always been applied to the public schools. It is divided among the township according to the amount of their taxable property, and then the dividend of each township is apportioned to its school districts, according to the number of children. As it regards the township tax, five

towns have raised \$3 per scholar, and ten \$2 per scholar. The district tax, being a new feature of the law, and not generally understood at the time of the regular meeting, on the Tuesday of the week following the annual town meeting, no taxes were levied at that time. Eight districts, however, have ordered taxes to the amount of \$4,090.00 at special meetings for that purpose. The money divided from the surplus revenue, State appropriation, town and district tax, now in process of receipt and expenditure, will be found in the accompanying financial report.

SCHOOL DISTRICTS.

I find that one of the most important, as well as the most difficult duties will be the re-adjustment of the school districts. In some parts of the county they are too numerous and consequently too small to enable the people to keep up good schools. I have impressed this upon the minds of the local school authorities, and at the request of the inhabitants, have abolished thirteen weak districts, and consolidated their territory into five strong ones. Several more changes of the same kind are under consideration. The re-numbering of the districts as contemplated by the State Board, in my judgment should be deferred till these necessary changes are made.

TEACHERS.

At the quarterly examination in August, sixty-four teachers were examined. Four were rejected, three for failure in literary and one for failure in moral qualifications. There has been a great improvement in our teachers for the past few years. From personal knowledge of many of them and from observation of their exercises in teachers institutes, I do not hesitate in believing that if sixty-four teachers of the county had been subject to such a rigid examination six or eight years ago, one-half would have been rejected. We may look for still greater improvement, as more money will be received and greater remuneration given, more efficient talent will be called into requisition.

SCHOOL HOUSES.

Our school houses, as a general thing, are inferior, but repairing or rebuilding is in agitation all over the county. A report of what has been done since the present law went into operation would do injustice to the spirit of our citizens, as the process of collecting through district tax though sure is not speedy. But I have no doubt that two or three years will show that the noble liberality of the State will be responded to by equal liberality on the part of our citizens.

THE SCHOOL LAW.

The law, thus far, has worked quite as well as its most sanguine friends could have anticipated. There are a few points, however, to

which I think attention might be directed, with a view to change. I would suggest that the County Superintendents should be invested with authority to administer an oath to the district clerks. It would contribute greatly to the convenience of the latter officer in returning his annual report. There is an ambiguity in the 77th section which could easily be remedied by a little verbal alteration. The 81st section contains a prohibition, which to some minds is questionable. As corporal punishment is abolished, something more salutary ought to take its place. What shall it be? What *can* it be but the exercise of the authority which the law has placed in the hands of the trustees? In one town in this county the trustees printed and gave general circulation to a set of rules, to which every child is required to conform, under penalty, upon a certain number of infractions, of being reported to the trustees of the district. This dread of being *reported to the trustees* has acted as a powerful restraint, perhaps even greater than the fear of corporal punishment. The teachers are satisfied with it and maintain better discipline than under the old system. If strict supervision of the trustees is given, no change, in my opinion, will be necessary. At any rate, let us give the new provision of the law a fair trial.

UNION COUNTY.

A. F. CAMPBELL, SUPERINTENDENT.

The statistical report for the first year must necessarily be very imperfect. Many of the district clerks, though furnished with a copy of the school law, have returned the blanks furnished them for the statistics without anything upon them except the names of the pupils in the district. In many cases it was difficult for them to obtain more information than this, because in very few of the districts was any book kept by the trustees, and the whole of the items needed for a full report, if kept at all, were kept in the book used by the township superintendent, which book was passed over to the township collector. You will observe that very many of the districts are only reported as to the children and the State and township moneys, while others are comparatively full. I have copied, *verbatim*, the reports of the clerks so far as obtained with reference to the condition of the school houses. Some that are reported as "good" and "fair," I should call poor and miserable. The difference is probably owing to the fact that many of the clerks compare what is comparatively a good condition of a house with a former more wretched condition; while I cannot pronounce either condition "good" or "fair." The one reported to be "somewhat out of repair," is the true condition of most of the houses.

A GLANCE AT STATISTICS.

In what may be said on this point it is to be understood that Elizabeth and Rahway are not included. As reported to me, there are in the county 3,487 children. Of this number only 277 have attended school a full year, while 402 have attended between six and nine months, 489 from three to six months and 382 less than three months, 1208 have attended school during the year, and 889 have not attended any school during the year. Though doubtless very imperfect, these figures nevertheless show an alarmingly small attendance upon our public schools.

The Financial Report shows that \$18,668.91 is the amount expended during the last year from all sources in the county, and out of

this \$1,471.35 of the State appropriation has been apportioned to the cities of Elizabeth and Rahway, leaving \$17,197.56 for the county, exclusive of those cities; \$2,548.29 is reported as tuition money, and \$5,000 only as district tax, which \$5,000 has all been raised by special act in District No. 1, Plainfield; \$2,954.28 is the amount of State money received by the county, and \$8,066 the amount of township taxes; \$4.93 is the average amount per scholar, for one year. The amount paid as tuition money, as reported, is \$2,548.29; doubtless if all that has been paid in the county had been reported we should find that \$5,000, at least, has been paid as a direct tuition fee.

The State and township taxes together, do not furnish funds enough to keep the schools open half the year.

One house had been condemned (more should have been) and the money allowed by law has been withheld.

SCHOOL HOUSES.

The houses for the most part are in a most wretched condition. Some are very comfortable, it is true, so far as houses without protection of any kind from sun or winds, or without ventilation, can be called comfortable. Some of the houses are not only unfit, but absolutely unsafe for habitation, except for cattle.

I visited one school during a shower of rain, and on a cool afternoon. It was impossible for most of the children to keep their seats, for the rain came in through crevices and windows sufficiently to wet them to their skins.

Another house in New Providence was actually unfit for cows, if light is necessary for such animals. I do not think the house has ever been painted; if it has, it was so long ago that no trace of paint is visible inside or out. There is no ceiling, but bare black beams, and instead of walls nothing but old black boards. In many places you could throw a stone of the size of a walnut through the cracks out of doors.

The habit of building by the roadside, with barely sufficient ground for the house to stand upon almost universally prevails.

I believe there is not a house in the county, except the one in Plainfield, that has more than one outhouse for both sexes. Some of the outhouses have but one apartment, while in those that have two, the apartments are divided by a simple board partition.

What can be more dangerous to the morals of the young?

FURNITURE.

With the exception of three or four houses, the old style prevails, of nailing the desks to the wall, so high as to demand straight backs, if the pupils heads are to rise above them, while semi-circular slabs, with sticks run through them for legs, are the seats for the pupils. By this arrangement, backs for the seats (a needless luxury) are saved and parents can be cheered with the prospect of young and delicate children with weak spines and bent backs at maturity. But what

matters it if the children are injured for life by this injurious seating? These seats, it is said, do not cost as much as comfortable furniture and the pockets of the parents are spared at the expense of their children's health. Frequently the legs of the seats are weak through age, or lost entirely; and the nearest boxes must be brought into requisition, upon which the semi-circular slab is placed, flat side down, of course, for the round side would not stay put. Then the children must sit upon the round side, and this fact accounts for their rolling off so easily. Too much cannot be said in condemnation of this barbarous way of seating the children, in most of the schools in our rural district.

TEACHERS.

In accordance with the provisions of the law, I chose E. C. Beach, Principal of the Plainfield High School, and N. W. Pease, Principal of the Elizabeth City School, to act with me as examiners. We have examined thirty-two teachers, of whom seven took "first grade certificates," three took "second grade," seventeen took "third grade." Three were rejected, and two are to be re-examined. The general standing of the teachers is very good, indeed.

A glance at the salaries paid the teachers for their arduous labors, is sufficient to show that, in proportion to the importance of their work, they are most miserably paid. Few of the female teachers get more than enough to pay their board, while many do not receive more than one-half enough, if they were required to board away from home.

From the foregoing facts, I am led to this suggestion: Would it not be well to provide an effectual remedy for this sad state of affairs? Would not a State tax, say of \$10 per scholar, assessed upon the property of the State, and distributed through competent channels and under proper restrictions to the various districts, be a remedy for all the evils that now attend our system?

I am constrained to believe that about half of the money actually paid to teachers in our rural districts, where the schools are kept open the whole year, comes from "tuition fees," and where no charge is made, the schools are only kept open a part of the year at best, and in some of the district's the schools have only been open three or four terms in a series of years. The consequence is, many of the children are growing up in ignorance. Would it not be well to make the State Appropriation so large that it would be an important object for the district to obtain it? As it now is, the amount of money allowed to be withheld from the district is so small that the loss is not perceptible. Were it all expended in repairs, it would not, in many cases, pay the wages of a carpenter for five days.

Would it come any heavier upon the people of the State to pay as tax the money now paid as "tuition?" If all the money due any district could be withheld until the inhabitants of the district had provided a good house, with all necessary outbuildings and play-grounds, would it not secure good buildings? Such a tax would buy the books necessary, and thus hundreds of children now kept out of school could

be educated. Sufficient money would thus be paid to provide maps, charts, globes, etc., and we would have, indeed, a "system of public instruction." Again: Is it wisdom to allow parents to rob their children of education, and thus squander the public money and inflict incurable evils on the State, by keeping the children out of school?

I shall hail with pleasure the day when it shall be obligatory upon parents and guardians to send their children to school between certain ages, a large portion at least of each year.

"Public education" well carried out will lessen our taxes for penitentiaries and almshouses, beside cementing the bulwarks of our glorious independence.

FINANCIAL SUMMARY.

TOWNSHIPS AND DISTRICTS.	Am't received from State.	Amount received from Surplus Revenue.	Amount received from Town Tax.	Amount received from Tuition Fees.	Total amount received for Schools.	Amount expended for Re-pairing, &c.	Number of Children between 5 and 15 years.

† Not reported.

WARREN COUNTY.

WILLIAM HOLT, SUPERINTENDENT.

It is my pleasure to report that the friends of popular education in Warren county, have been cheered by the happy results of our new school law.

I am able to report a decided improvement in the condition of the public school buildings in the county. There have been many public school buildings erected in the county which are a credit to the friends of public schools, in the localities in which they have been built; others, upon which the hand of time has rested too heavily, have been remodeled and rendered neat and commodious; and still others have been sufficiently repaired to escape the vengeance of the law, and to enable the County Superintendent to apportion the State School Fund. *Even in the village of Hope*, in all probability, will be erected soon, a public school house, which will be an honor to their otherwise enterprising town.

When the people composing a school district, shall fully appreciate the power of the *ballot*, *good bye* to those little *seven by nine structures*, called school houses, which have so long disgraced the State of New Jersey.

The County Board of Examination have examined about one hundred teachers, and I am happy to say that those examinations were highly satisfactory. Upon the whole, I am able to report progress; "*God speed the right.*"
